Important Notes

The appearance and the disposition of elements and components may be different from the illustrations. The manufacturer retains the right to execute some technical changes without any prior advertising without any influence on the quality of the products.

CAUTION!

Hydrocarbon gases and refinery products are flammable products! Danger of freezing! Installation and servicing have to be carried out by qualified personnel only.

Professionals have to be trained and qualified especially to work with the equipment for flammable gases and liquids. The operation with liquefied gas installations is only permitted, if every safety rule and regulation is strictly observed and considered .

Please read and follow all instructions, guidelines and rules as per description in the accompanying documents. The guarantee obligations will be invalid in case of contempt against rules and instructions . The manufacturer resumes no liability for damages which were a result of the improper use of the installations.

DISCLAIMER

The information of this catalogue are compiled with utmost care and according to current knowledge. However company FAS resumes no warranty for accuracy, completeness and actuality o f the contents. All written texts and stated dimensions in this catalogue are non-binding. The graphics and illustrations are exemplary. Construction and design changes are expected.

Flüssiggas Anlagen GmbH

Flüssiggas Anlagen GmbH (FAS), established in 1975, specializes in the development and production of technological equipment for the oil and gas industry.

With about 50 years of experience, our international team provides an independent and safe energy supply to consumers worldwide.

Our team of highly qualified engineers develop environmentally friendly and cost-effective solutions for the Petrochemical and LPG, LNG and CNG industries (gas filling stations, industry facilities, municipal utilities).

This catalogue reflects only a small part of the complete production and supply program and has the following sections:

- equipment for Liquefied Petroleum Gas (LPG, propane-butane)
- equipment for the industrial gases and petrochemical industries
- equipment for Liquefied Natural Gas (LNG) and CRYO generally

50,000 nomenclature items for the oil and gas industry

Implementation of major projects for the world's leading fuel and energy companies

Professional customer support online

Many years of cooperation with the world's leading manufacturers

In recent years, FAS and FAS-Modern Industrial Solutions have formed a solid technological foundation allowing our customers to achieve roughly any objective in the oil and gas industry.

Effective cooperation with a number of leading manufacturers in Europe and the United States, complemented by cooperation with regional engineering centers, allows to implement the full range of tasks at the highest engineering level.

Based on our experience and know how we provide you optimal solutions considering technical and economic aspects. Besides the "LPG Sector" (Liquefied Petroleum Gas) we also offer various services in the field of "LNG" (Liquefied Natural Gas) as well as "Cryogenic plants and equipment".

Effective and result-based activities in the field of authorization and approval procedures complete our wide range of services. FAS pays great attention to logistics of the implemented projects and has one of the largest warehouses of gas and petrochemical equipment in Europe with the richest range of equipment, components, spare parts and consumables.

A

Compressors

Dry run piston compressor

- vertical execution
- oil-free dry run piston compressor
- V-belt drive
- air cooler
- suction and pressure gauge

Order No.	Type Corken	Max. capacity (m ³ /h)

4	Electrical control box for installation inside the building and outside of protection zone	26 932						463206
4.1	Isolating switch amplifier, type of protection – EEx ia II C – 4 pcs.* per compressor unit	26 301						
4.2	Measuring transmitter PMT 50 Ex for PT 100 – 1 pc. per compressor unit	26 3140						
5	Flexible hose PN 40, stainless steel, L=1000 mm on both sides lapped flanges – 2 pcs. per compressor unit	-	21 175	21 191	21 192	21 193	82739	

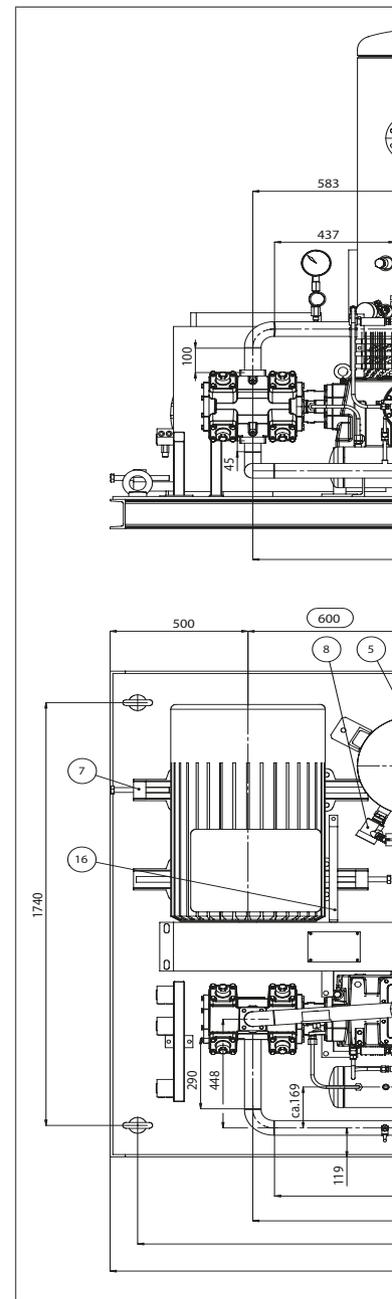

*Attention! Quantity of item 2.1 is depending on the quantity of items 1.3-1.6. Each devise needs 1 pc. of item 2.1.

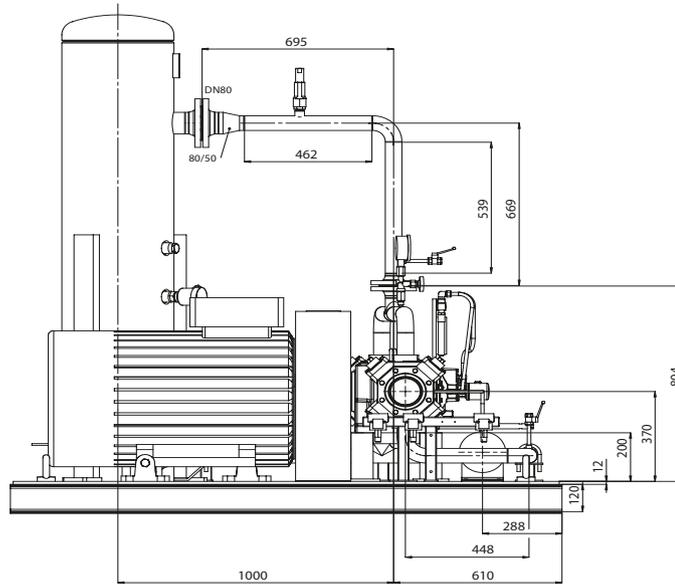

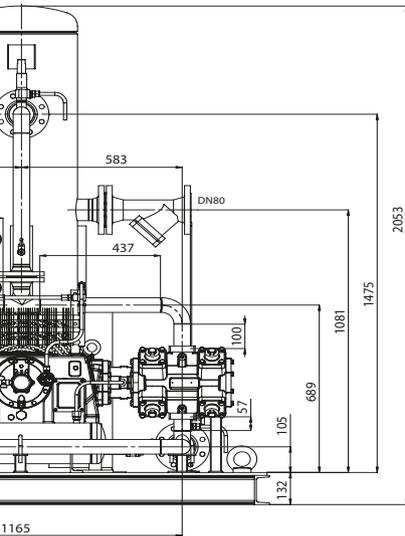

**HG compressors are equipped with one strainer only.

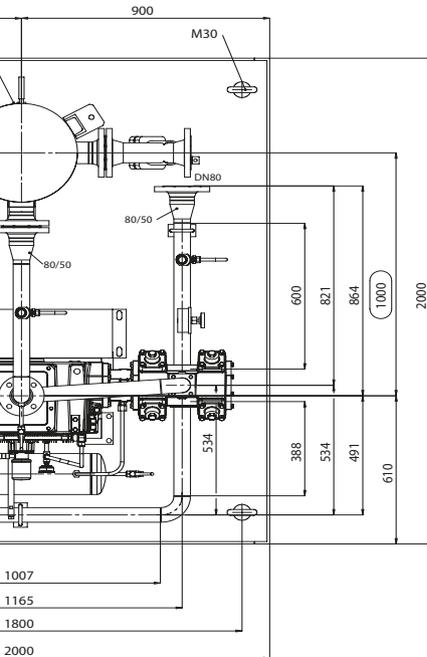

FAS 46 300 horizontal compressor unit Type FAS-Corken HG 601 BB

- medium – LPG
- cylinder number/stage number – 2/1
- capacity – up 375 Nm³/h
- min. inlet pressure – 0,5 bar
- speed – 1100 U/min
- with pressure monitoring system (gas/oil), liquid gas trap, strainer, four-way ball valve, safety relief valve (adjustable), V-belt drive with protection plate
- 3-phase motor with a capacity of: 58 kW, EEx IICT3, 400/690 V, 50 Hz

Dimensional drawing for FAS 46 300 horizontal compressor unit Type FAS-Corken 601

Mobile compressor unit

- for use in Ex zone
- dry running piston compressor unit with three phase motor 400/690 V in EX-execution
- with pressure monitoring and safety fittings
- Ex-control unit for three phase motor with 30 m connection cable
- 2 LPG hoses a` 12 m with shut-off valves
- mounted on a light ground plate, grounded and painted, mounted on a hand cart (up to 60 km/h)

Additional equipment for liquid phase: high pressure hoses, sight flow indicator, strainer, valves. Can be designed on a base frame for the mounting in a car.

Complete pump-compressor station

for transferring of propane / butane from tankers, rail tanks and road tankers. "Ready to use" design including all necessary pipe lines, process and safety equipment.

Available with all types and numbers of pumps and compressors.

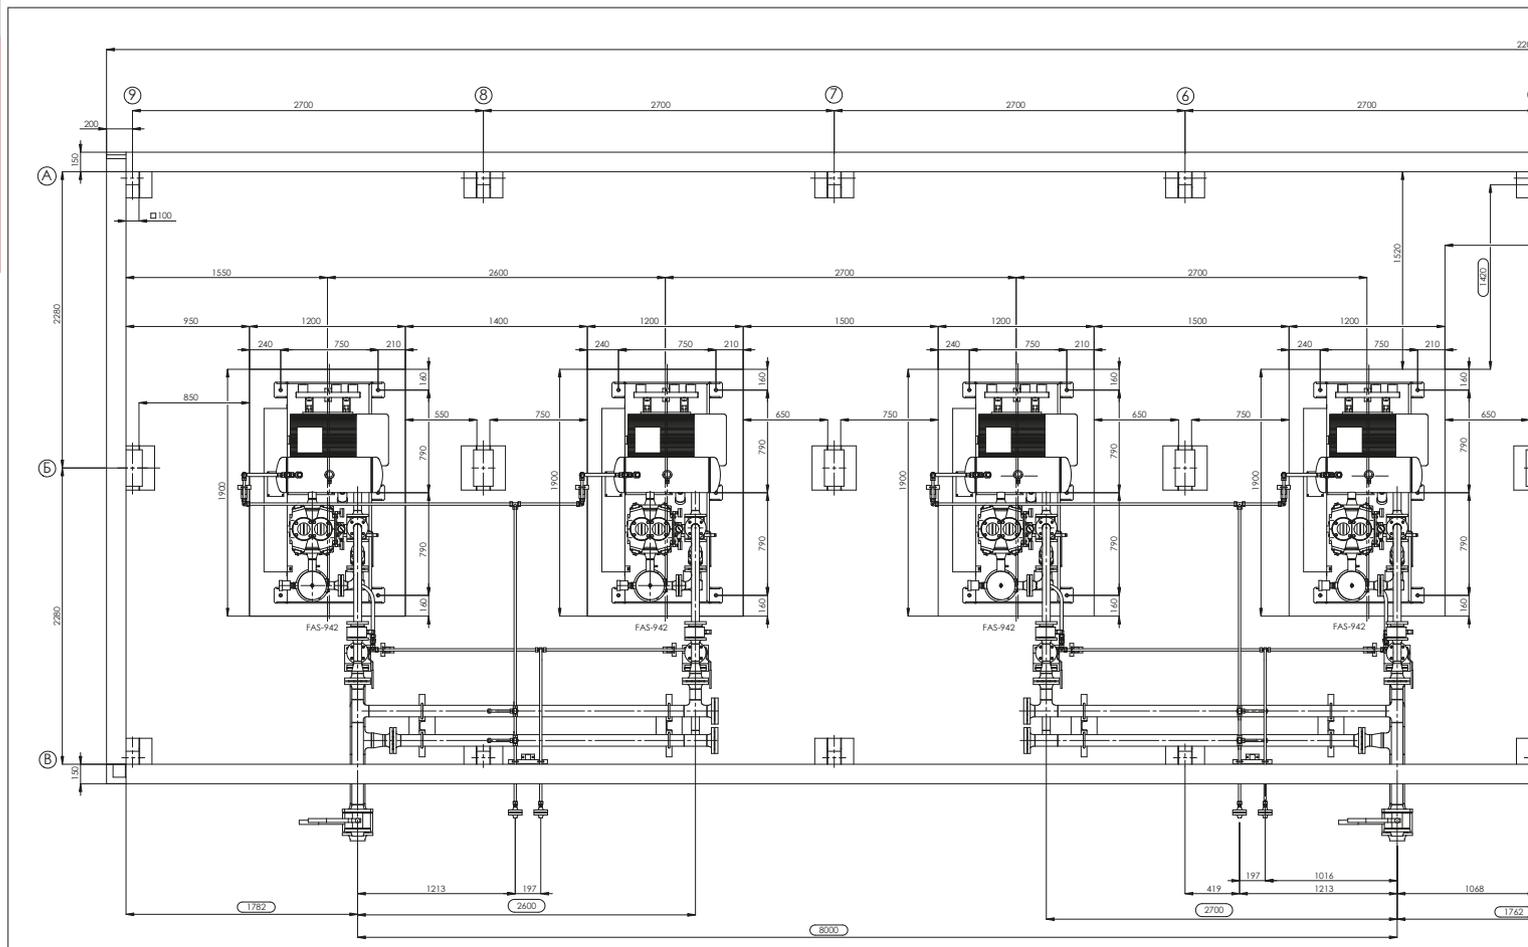

Example versions:

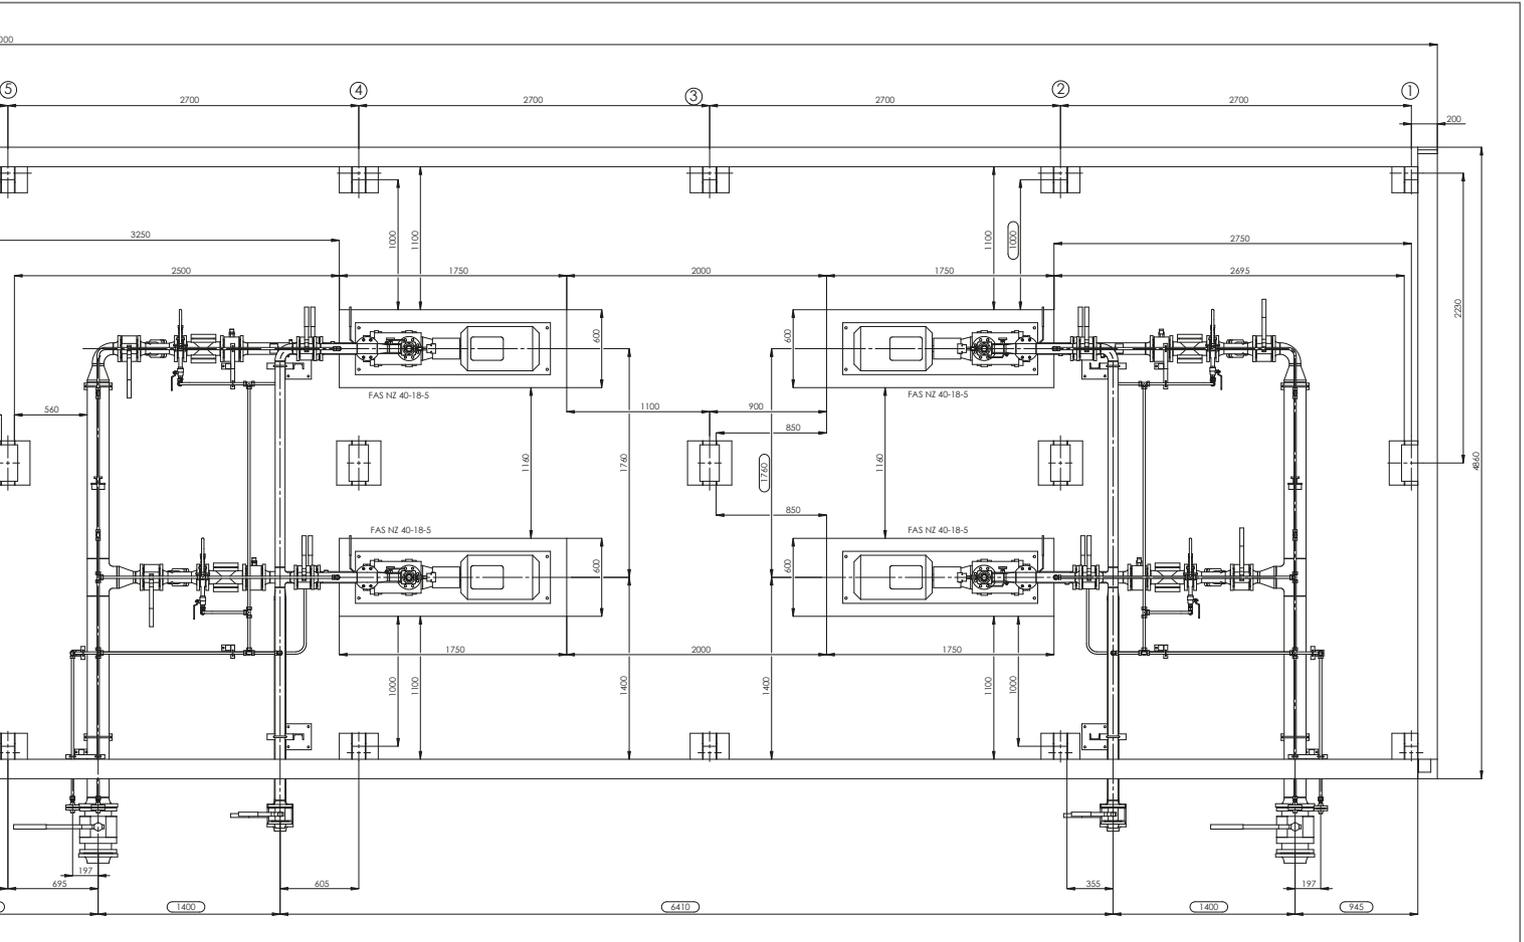

- FAS 93 374 – 3 compressor units 200 m³/h each, 2 pump units 40 m³/h and 18 m³/h
- FAS 93 3740 – 4 compressor units 200 m³/h each, 2 pump units 40 m³/h each
- FAS 93 3748 – 4 compressor units 200 m³/h each, 4 pump units 40 m³/h each (see drawing below)
- FAS 93 3733 – 2 compressor units 100 m³/h each, 3 pump units 18 m³/h each
- FAS 93 3740 – 4 compressor units 100 m³/h each, 4 pump units 40 m³/h each

Other versions are available on request.

Inlet/Outlet

	Outlet	DN 100

Accessories, additional equipment and safety devices for piston compressors

Mechanical liquid trap type FAS

- made from steel
- with ball valve 3/8" NPT made from steel for condensate drainage
- available connection for installation of an electrical filling-level sensor

Mechanic liquid trap Type FAS

- made from steel

Order No.	Type Compressor	Connection	Content, l	Weight, kg
21 171	Blackmer 161/162/361/362	1 1/4"	9,7	14,4
21 170	Corken 290/291/D291/490/491/D491		9,7	14,4
21 172	Blackmer 601/602		13,0	16,3

Pneumatic actuator for 4-way ball valve

- without spring reset
- operating angle 90°
- designed to handle a pilot pressure of 5-8 bar
- complete with mounting bracket and screws

with NPT-thread

with DIN-flanges

Order No.	Type compressor	Connection	Execution	Content, l	Weight, kg
21 130	161/162	DN 20	TKW for stationary systems	5,8	18,4
21 131	161/162	DN 25		5,8	18,7
21 132	361/362	DN 32		5,8	19,1
21 133	601/602	DN 40		7,8	21,3
21 134	942	DN 50		30,0	49,4
26 130	Filling-level sensor type VEGASWING, probe – stainless steel L=69 mm, case: synthetic, operating temperature range 40...150°C, operating pressure – up to 64 bar				
26 301	Switch amplifier for stationary systems, 1 channel intrinsically safe circuit (Ex i) IIC with relay outlet, 1 changeover contact, supply voltage: 230 V, 45...65 Hz, NAMUR				
21 137	Shut-off device, pneumatic, PN25 (for trucks), connection 2" NPT AG, control pressure 1,4 – 4,1 bar				

Order No.	Execution
21 180	with NPT female thread (order No. 21140-21143)
21 020	with DIN flanges DN 20-32 (order No. 21147-21149)
21 181	with DIN flanges DN 40-50 (Order No. 21150 and 21144)
21 200	Limit switch in housing, Ex-proof, for position feedbacks, without display
19 748	5/2-way solenoid valve, Ex-proof, with NAMUR connection, for compressed air max. 10 bar, thread connection G 1/4", operating voltage 230 V-AC, 50 Hz
19 749	5/2-way solenoid valve, Ex-proof, with NAMUR connection, for compressed air max. 10 bar, thread connection G 1/4", operating voltage 24 V-DC

Safety relief valve PN 40 for stationary systems

- angled form, soft seal
- free of non-ferrous metal
- set at 19 bar

Order No.	Inlet/outlet, "	Weight, kg
21 145	G 3/4 AG / G 1/2 IG	2,3

4-way ball valve PN 40

- from forged steel
- acc. to AD A4 requirements
- seals from PTFE/Viton

Executions:

- A – with manual lever
- B – with pneumatic actuator without spring reset, operating angle 90°, designed to handle a pilot pressure of 5-8 bar

Order No.	Execution	Weight, kg	Connection	Type Compressor
21 140	A	5,1	¾" NPT	161/162

Temperature monitoring at the compressor outlet

Art. 26 312

Order No.	Description
26 130	Filling-level sensor, process connection – 1" NPT, PN25, output – 2-wire NAMUR-signal, designed for use in Ex zone
26 301	Switch amplifier 1 channel intrinsically safe circuit (EEx i) IIC with relay outlet, 1 changeover contact, supply voltage: 230 V, 45...65 Hz, for installation in an electrical switch box, NAMUR, type of protection (EEx i) II C
26 312	Resistance thermometer PT 100, M18×1,5 AG connection, stainless steel probe Ø 6 mm, length 100 mm, 3-wire-connection, for temperature monitoring of compressed gas
26 3140	Measuring amplifier PMT 50 Ex, intrinsically safe inlet (Ex ia) for resistance thermometer PT 100, with relay outlet for 2 limits 110°C/130°C, with temperature indication, with voltage and current outlet for additional level indicator. Operating voltage: 230 V AC.
26 316	Welding Thermometer well for temperature sensor acc. to DIN 43769. Form D1, material C 22.8

Pressure monitoring for compressor suction and pressure line

Order No.	Description
High pressure switch (pressure side), setting range 4-25 bar, set at 15 bar	
EU 18 4561 non EU 18 456	Pressure switch with Ex I – equipment, for intrinsically safe circuits, break contact with resistance combination for break of circuit and short circuit monitoring, single pole changing over, gilt contacts, differential gap 1,0 bar, only for suitable switch amplifiers (FAS 26301 against more cost).
Low pressure switch (suction side), setting range 0,5-6,0 bar, set at 0,8 bar	
EU 18 4573 non EU 18 457	Pressure switch with Ex i – equipment, for intrinsically safe circuits, break contact with resistance combination for break of circuit and short circuit monitoring, single pole changing over, pressure side connection – nipple G1/2"-AG, gilt contacts, differential gap 0,25 bar, only for suitable switch amplifiers (26301 against more cost).
Pressure switch oil-pressure control, setting range 0,5-6,0 bar, set at 1 bar	
EU 18 4621 non EU 18 462	Pressure switch with EX I – equipment, for intrinsically safe circuits, break contact with resistance combination for break of circuit and short circuit monitoring, single pole changing over, gilt contacts, differential gap 0,2 bar, only for suitable switch amplifiers (FAS 26301 against more cost).
Accessories for pressure switches	
21 195	Bracketry for securing pressure switch to steel base plate including pulse conductors and assembly

B

Pumps

LPG-Pumps

for LPG filling stations, trucks and stationary facilities

- housing from ductile cast iron ASTM A536
- mechanical seal
- with free shaft end

Executions:

- A – with NPT thread flanges
- B – with flanges acc. to DIN 2635
- C – with ANSI-flanges for internal valve

Order No.	Execution	Pump Type	Capacity, l/min (capacity data at 5 bar differential pressure)	Max. differential pressure, bar	Weight, kg

Order No.	Pump	Remarks
21 331	LGLD3 F (NPT)	Complete with 3" NPT threaded flanges, shaft exit on both sides
21 332	LGLD3 F (SA)	Complete with 3" welding flanges, shaft exit in both directions
21 300	LGL3 F (OFL)	Flanges excluded, right hand rotation
21 334	LGLD4 F (SA)	Complete with welding flanges 4" (inlet) 3" (outlet), shaft exit on both sides
21 327	TLGLF4B (SA)	Inlet 4" ASME, outlet 3" and 2 pcs of 2" welding flanges, right hand rotation

Pump unit type FAS-Corken FD-150

- housing from ductile cast iron ASTM A536
- flow rate – up to 180 l/min
- max. differential pressure – 13,5 bar
- speed – up to 3000 U/min
- inlet – flange DN 40 (PN 40, DIN 2635)
- outlet – flange DN 25 (PN 40, DIN 2635)
- dimensions – 800×385×260 mm
- mechanical seal
- coupling
- Ex-Motor 400/690 V/50 Hz AC, E Ex II T3
- coupling protection
- mounted on a base plate, primed and painted

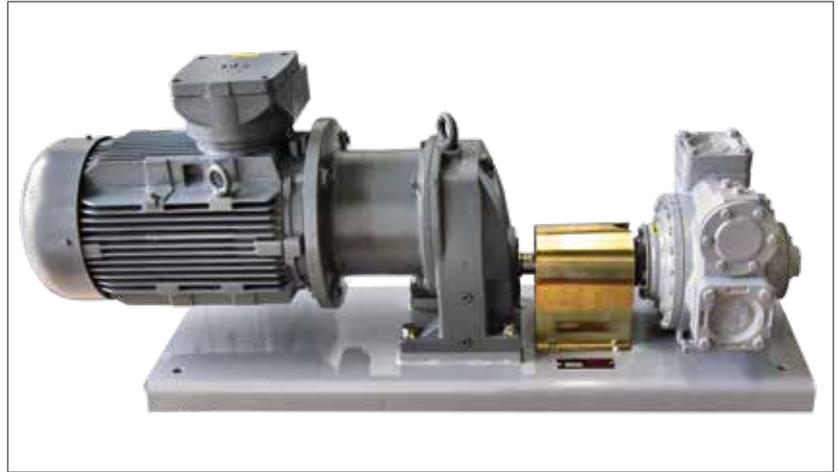

*Dimensional drawing
of the pump unit FAS-Corken FD-150*

Order No.	Motor capacity, kW
EU 91 434	4,6
EU 91 501	5,5
non EU 91 5025	5,5

Pump unit FAS-Corken or FAS-Blackmer

- for positive suction head
- pump case of ductile iron ASTM A536
- with single-acting mechanical seal
- complete unit mounted on a common base plate from steel
- ready for connection, primed and painted
- with Ex-spur-gear-motor 400/690 V, 50 Hz, including coupling and coupling protection

Order No.	Pump Type	Motor, kW	Capacity, l/min	Speed, RPM	Weight, kg
21 225	FAS-Corken Z 2000	5,0	190 (power rating at 7 bar differential pressure)	560	120
21 3160	FAS-Corken Z 3500	10,0	480 (power rating at 7 bar differential pressure)	560	243
21 808	FAS-Corken Z 4500	15,0	950 (power rating at 5 bar differential pressure)	560	413

The pump units can be equipped with other motors of different capacities or speed as well in various types of protection (for example flameproof / Ex d)

21 311*	FAS-Blackmer LGL 1"E	1,0	18	1500	32,0
21 312*	FAS-Blackmer LGL 1"PE	1,0	34	1500	32,0

FAS-Corken
pump unit Z 3500

Pump unit with hydraulic motor

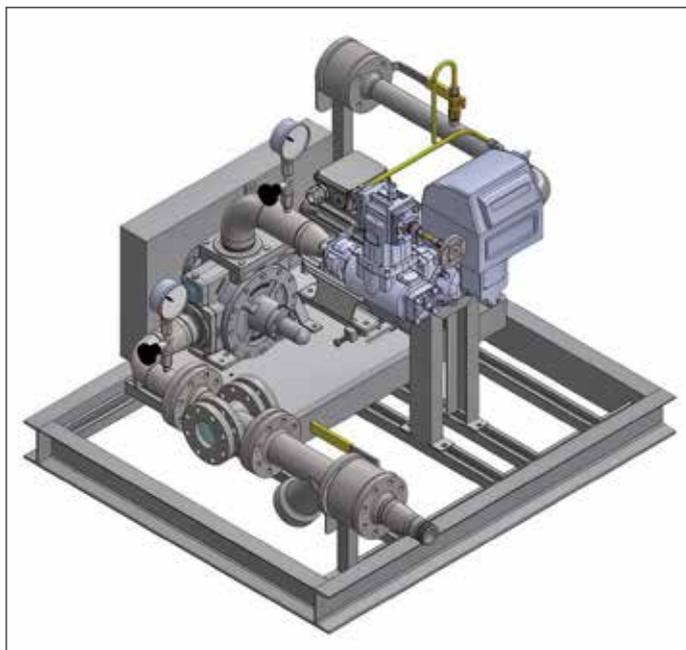

- for positive suction head
- pump case of ductile iron ASTM A536
- with single-acting mechanical seal
- complete unit consisting of pump hydraulic adaptor, coupling and hydraulic motor
- ready for connection mounted, primed and painted

Order No.	Pump Type	Motor, kW	Capacity, l/min	Speed, RPM	Oil recirculated quantity, l/min	Oil pressure, bar
Pump with NPT-threaded flanges, right-handed, execution A (Corken/Danfoss)

Pump unit FAS 93 1887

Pump unit FAS 93 1890

Complete „ready to use“ pump unit for refueling of cars

- side channel pump
- coupling with coupling protection
- Ex-motor 400/690 V/50 Hz AC, E Ex II T3
- gas bubble trap
- mounted on a ground frame, grounded and painted

Order No.	Pump unit/ motor capacity, kW	Connection DIN (Inlet/Outlet)	Max. differential pressure, bar	Capacity, l/min (at differential pressure 10 bar)
93 3113	NZ 36-6/5	50/32	10	50
93 3112	NZ 36-8/5	50/32	14	100

Additional equipment

Order No.	Description	Connection
92 156	Ball valve	DIN 50
18 5930	Sight flow indicator	DIN 50
14 0168	Strainer	DIN 50
12 534	Back check valve	DIN 50
18 382	Flow detector dip sensor	½" NPT
18 381	Flow detector analyzing device	230 V AC

Complete suction pump unit for the transfer of LPG from underground tanks

- side channel pump
- coupling with coupling protection
- Ex-motor 400/690 V/50 Hz AC, E Ex II T3
- gas bubble trap
- mounted on a ground frame, grounded and painted

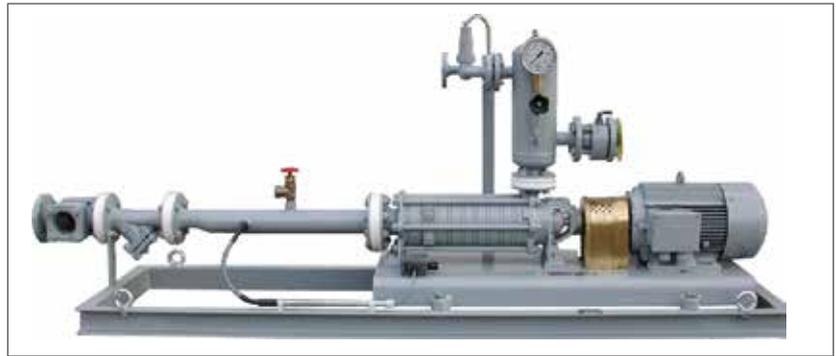

The complete side channel pump unit is equipped with two types of pump units:

- capacity 50 l/min (for one or two dispensers);
- capacity 100 l/min (for two or three dispensers),
- with three phase motor 5 or 6,8 kW.

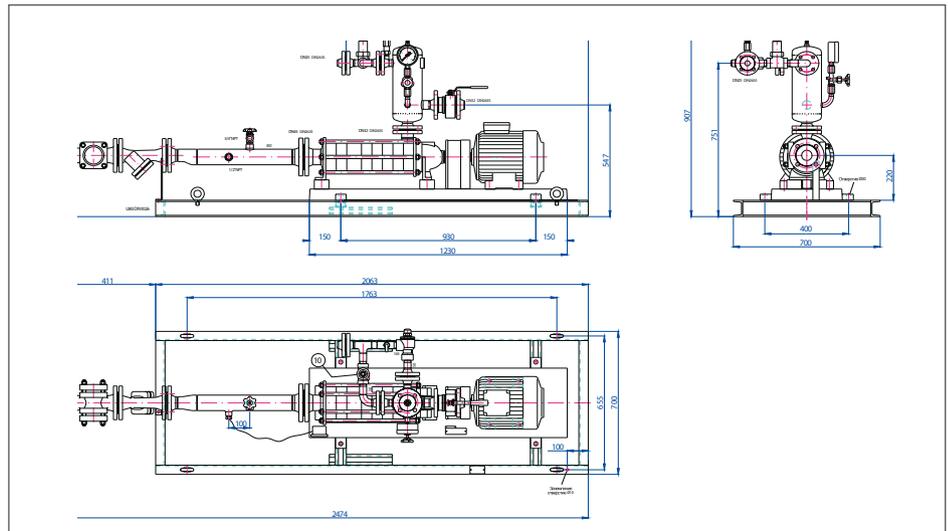

The gas bubble trap facility is equipped with a mechanical liquid gas trap, by-pass valve, pressure gauge with shut-off valve, back check valve, ball valve and differential valve, strainer and pipe line.

Executions:

- A – with 3-phase motor 5 or 6,8 kW, with sight flow indicator
- B – with 3-phase motor 5 or 6,8 kW, without sight flow indicator

Order No.		Pump unit type	Connection DN (Inlet/Outlet)	Max. differential pressure, bar	Capacity l/min at differential pressure 10 bar	Weight, kg

Dimensional drawing of complete suction pump unit capacity 50/100 l/min with 3-phase motors 5/6,8 kW

LPG side channel pump unit for above ground and underground tanks

- for positive suction heads
- mechanical seal
- flanges in PN 25/40 with flat seal strip
- Ex 3-phase motor 400/690 V/50 Hz AC, E Ex II T3
- coupling with coupling protection
- mounted on a ground frame, grounded and painted

Executions:

- A – side channel pump unit for above ground tanks; with mechanical seal, coupling and coupling protection
- B – side channel pump unit for underground tanks; with mechanical seal, coupling and coupling protection

Horizontal, self-priming pump unit in a link-body version with open impellers

FAS 93 583 Service kit in a tool bag for service technicians

Service kit in a tool bag with calibrated flow turbine and set of adaptors for connection to internal filling valve. For control measuring of LPG Dispenser Type FAS-120/220/230 after.

Consists of:

- Tool bag
- Measuring turbine, max. flow capacity 50 l/min, with 1 3/4" ACME connections
- 1×FAS 22344 rotary switch attachment
- 1×Adapter FAS 13532, T3 / W 21,8×1/4" male
- 1×Adapter FAS 13518, 1 3/4" ACME coupling / Bajonett
- 1×Adapter FAS 13509, 1 3/4" ACME coupling / T3
- 1×Adapter FAS 10065, 1 3/4" ACME male / W 21,8×1/4" male
- Protective glove

Conversion kit for modification of a LPG-dispenser type FAS of early versions

The conversion kit makes it possible to modify quickly an early version of LPG-dispenser with piston meter. **Consisting of:**

- 2 pcs. of Coriolis mass meter, cable, LCD-display and 2 pcs. differential pressure valves
- Installation material
- Manual

Order No.	Description
93 602	Conversion kit for modification of dispenser FAS-230 with one 4-piston meter, year of manufacture from 2007
93 6020	Conversion kit for modification of dispenser FAS-230 with one 2 or 4-piston meter, year of manufacture before 2004
93 6021	Conversion kit for modification of dispenser FAS-120 with one 2-piston meter
93 6026	Conversion kit for modification of dispensers FAS-120/220 with one piston meter in a dispenser with a mass meter
93 6030	Conversion kit for modification of dispenser FAS-230 with two-piston meter in a dispenser with a mass meter

Complete FAS filling station type FAS

FAS LPG filling stations are designed as "ready to use" units according international regulations including several engineering advantages:

- serial production
- short time for installation
- low operation cost
- full operation control
- several types of dispenser available
- several types of pumps available
- "easy to transport" design

FAS LPG filling stations are available in several modifications:

- LPG tanks: 1-4
- LPG tanks available volume: from 2 up to 25 m³
- LPG dispensers: 1-6
- LPG pumps: FAS-NZ, CORKEN, Blackmer, EBSRAY
- version with filling of LPG bottles available
- e-control box: customized according user specifications or FAS standard

Base configuration:

- Corken FD 150, Z 2000 or FAS NZ 36-8 pump units;
- bypass valve in the bypass line;
- strainer;
- complete piping;
- pressure gauges with shut-off valves;
- flanged ball valves;
- connection assemblies for gas vehicle with protective caps (liquid and vapour phases)

The station is designed and implemented according to the **block-modular principle**. Functional and technological possibilities of the filling station (fuel reserve, dispensing capacity, metering automation, etc.) can be expanded by connecting the corresponding modules without the need for large-scale construction, installation and adjustment works. These features of FAS stations make it possible to confidently compete in the complex fuel market.

LPG filling stations are available as **FAS STANDARD** or **CUSTOMIZED** according operation conditions --

FAS 93 3093 complete FAS “ready to use” pump units

for LPG car refueling station, prepared for installation of LPG dispenser and 1, 2 or 3 pcs of LPG tanks

Consisting of:

- FD-150 pump unit with mechanical seal, capacity up to 100 l/min, Ex-motor 4,6 kW, 400/690 V, 50 Hz
- supply line with ball valve DN 32 and fine filter DN 32
- discharge line with ball valve DN 25 with mounting flange
- bypass line with bypass valve and ball valve with mounting flange
- all necessary additional equipment for safety operation
- connections for road tanker

All equipment is painted. Mounted on a common galvanized frame. The frame is prepared for mounting of all types of FAS dispensers.

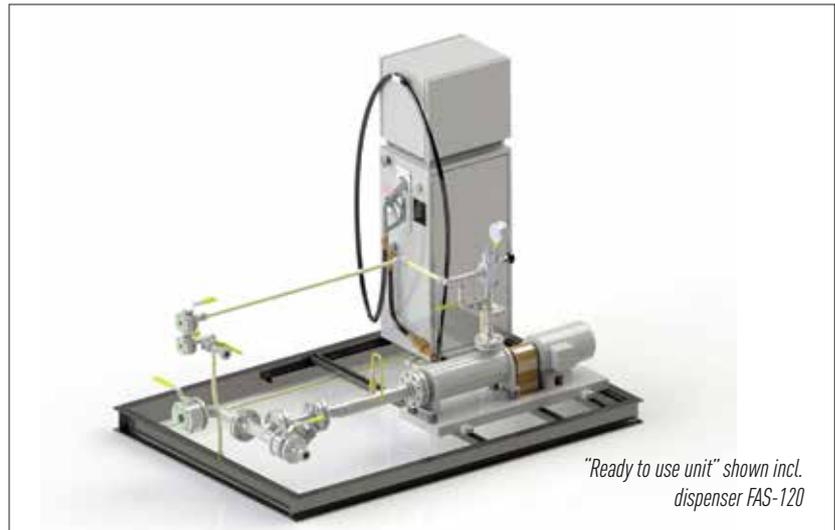

**FAS 93 3092 complete FAS “ready to use” pump units**

for LPG car refueling station, prepared for installation of LPG dispenser and 1, 2 or 3 pcs of LPG tanks

Consisting of:

- side channel pump unit with mechanical seal, capacity of 100 l/min, Ex-motor 5 kW, 400/690 V, 50 Hz,
- supply line with a ball valve DN 32 and with a fine filter DN 32
- discharge line with a ball valve DN 25 with mounting flange
- bypass line with bypass valve and ball valve with mounting flange
- all necessary additional equipment for safety operation
- connections for road tanker

All equipment is painted. Mounted on a common galvanized frame. The frame is prepared for mounting of all types of FAS dispensers.

“Ready to use unit” shown incl. dispenser FAS-120

Complete LPG-filling station type FAS with underground storage tanks of 4 850 up to 20 000 l

LPG-Filling Station for filling of cars with LPG:

- Underground storage tanks
- Common steel base frame, with LPG-Dispenser, pump unit for the removal of liquid phase from the tank, incl. all the necessary safety- and shut-off fittings, strainer, by-pass valve and all necessary pipe lines
- The construction on a common frame reduces the installation and remanufacturing costs, speeds mounting and commissioning, retaining system stability.

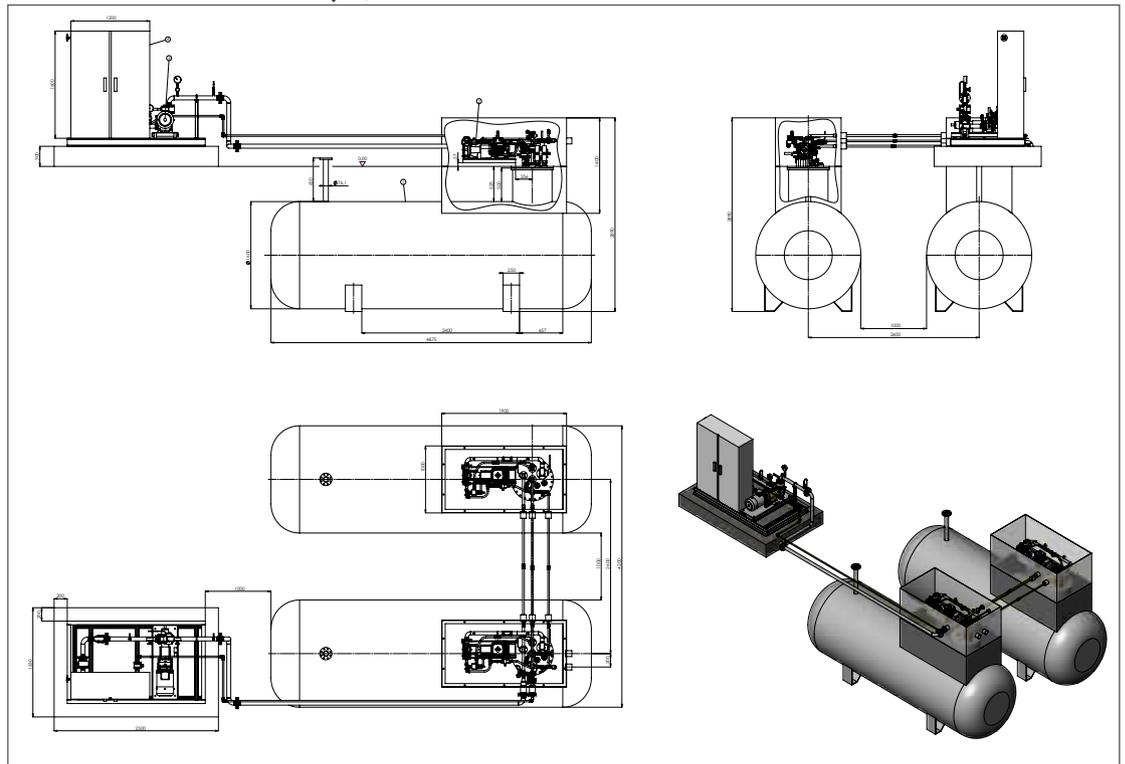

Main components:

- 1-3 underground storage tanks for LPG (4,85/6,7/9,0/20,0 m³)
- Complete self-priming pump facility with pump unit type FAS-AP, capacity 50/100 l/min
- By-pass line
- Pipe lines for filling of cars, filling and emptying of storage tanks, also by emergency emptying
- Dry running protection – flow detector dip sensor
- Insulating flanges for underground pipe lines
- 1-4 LPG-dispenser type FAS, with one or two filling nozzles, capacity – up to 50 l/min
- Complete measuring, shut-off and safety fittings

*"Ready to use unit" with FD-150,
prepared for connections
with two LPG tanks*

Execution and installation versions will be processed accordingly to country-specific regulations and standards as well as to specific customer requirements and can be combined in modular construction system if necessary.

Complete compact LPG-filling station type FAS

with one underground storage tank

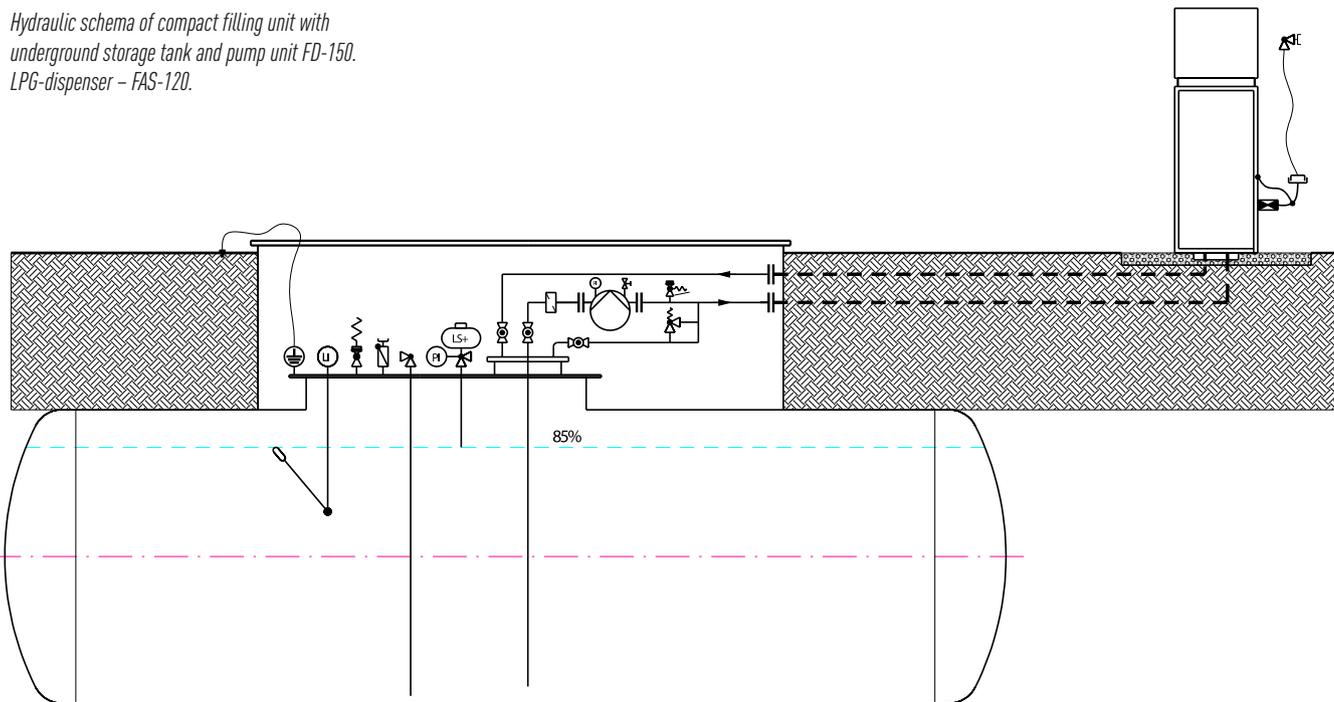

- Capacity of filling station is up to 20 cars per hour
- Completely pre-assembled and tested
- Quick installation and commissioning

Neither long construction nor mounting works are required. Only a spoil for storage tank and a trench for power supply as well as data cables are needed. Pump unit is equipped with pump FD-150, flow capacity 90 l/min at differential pressure of up to 10,5 bar and electrical motor with motor capacity 4,1 kW in Ex-execution.

REMARK: the execution of this compact station is possible with LPG-dispenser type FAS-220 WM

Hydraulic schema of compact filling unit with underground storage tank and pump unit FD-150. LPG-dispenser – FAS-120.

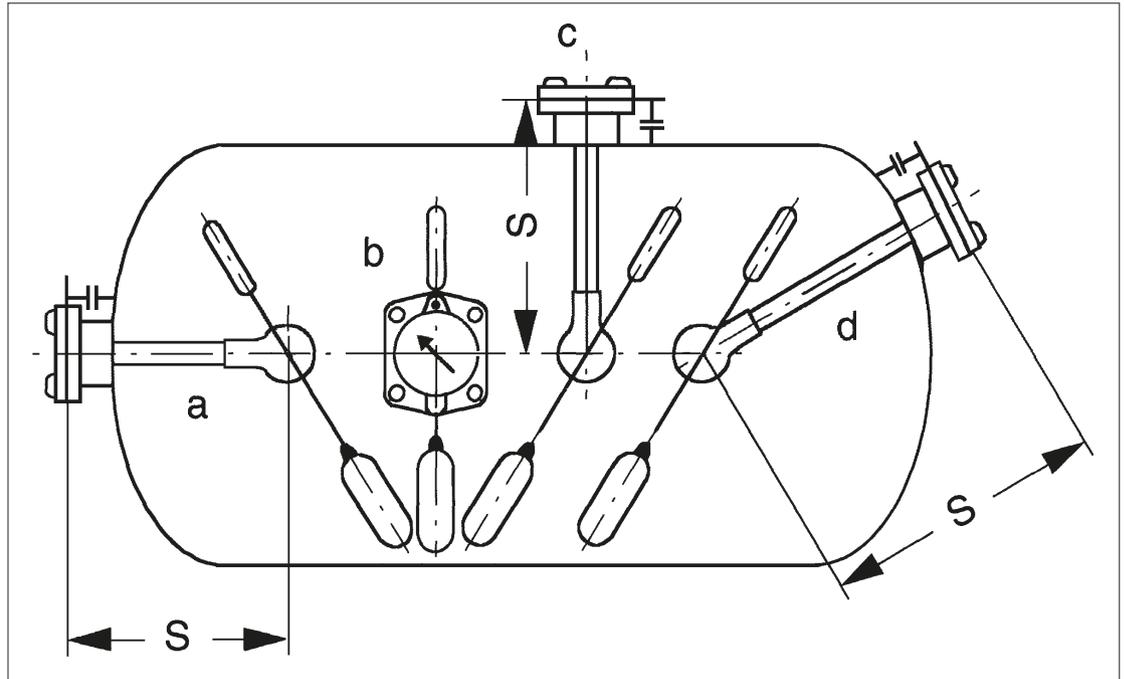

D

Measurement and control equipment

Floating liquid level gauge

- with transfer of measured values in % of tank volume

**By order must be specified:**

1. Type name: Junior, Senior, large tank version
2. Tank inside diameter
3. Tank type: cylindrical or spherical
4. Mounting position:
 - a. End mounted in tank bottom
 - b. Side-mounted in tank shell
 - c. Top-mounted
 - d. Angle-mounted in tank bottom or in tank shell
5. For dimensional determination of gauge:
 - for 4a) Stem length (S)
 - for 4b) Stem length (S)
 - for 4c) distance from center line of tank to top of mounting flange (S= stem length)
 - for 4d) degree of angle between horizontal center line of tank and center line of liquid level gauge or vertical distance in mm from horizontal center line of tank to center of gauge; distance from center of motion of liquid level gauge to top of mounting flange (S = stem length)

Liquid level gauge PN 25, Type Junior

- with rubber seal
- protection cup
- mounting screws M6×25 from stainless steel

Order No.	Type Junior	Mounting position	Tank ø, mm	Shaft length, mm
18 001	6284	horizontal	up 800	≈350
18 002			up 1250	
18 003			up 1600	
18 006	Special execution for ammonia

18 015			1250	785
18 016			1250	805
18 017			up 1600	up 1200
18 019	Special execution for ammonia			

**Liquid level gauge PN 25, Type Senior**

- with rubber seal
- protection cup
- mounting screws M6×25 from stainless steel

Order No.	Type Senior	Mounting position	Tank ø, mm	Shaft length, mm
18 021	6283	horizontal	up 1600	≈200
18 031	6280	vertical	up 1500	up 825
18 032			up 2000	up 1200

**M6300 series Magnetel gauges**

- special design for mobile applications such as truck, trailer, container

Model	Mounting	Model	Mounting
6339 M11	Side, End 45°	6342 M12	Side, End 45°
6342 M11		6339 M16	
6339 M12		6342 M16	

Liquid level gauge large tank version for horizontal cylindrical tanks

- horizontal installation
- 8" dial
- spiral wound gasket 1.4571/graphite to 550°C
- screws M12×25 from stainless steel

Executions:

- A – for propane/butane, Type W709, flange PN 40, from 1.4541
- B – for propane/butane und ammonia, flange PN 25, from stainless steel
- C – for propane/butane, Type W709, with spring shock absorber for road tankers, shaft length – 475 mm, side mounting, flange PN 40, from 1.4541

TDR-Sensor

for continuous liquid measurement of filling level and of separator

- filling level sensor VEGAFLEX 81 for mounting in tank
- switch amplifier type VEGAMET 381 for continuous measurement with integrated limit switches
- for installation in electrical switch box
- filling level measurement of LPG in tank in the real time
- control of minimum and maximum values of tank filling (for example 5/85%) with supply control signal for switching off of pump motor or of solenoid valve control at reaching of minimum or maximum filling level

Order No.	Execution
26 0855	Level sensor VEGAFLEX 81 with built in display-operation module (PLICSCOM), EX ia IIC T1..T6 X, thread G¾, material 316L
26 182	Switch amplifier type VEGAMET 381 for filling level sensors, Inlet: 1×4-20 mA, Outlet: 1×0/4-20 mA – current outlet, 2×Relay outlets, 1×device defect relay, operating voltage: 20-253 V AC, 50/60 Hz, error of indication-accuracy±20µA (0,1% from 20mA), number of relay outlets 2×operation relays, 1×device defect relay, LC display for digital and analog presentation of measured value, ambient temperature -20...60°C, protection art IP 40
26 087	VEGACONNECT 3 interface adaptor between PC and communicable VEGA devices

Devices for „dry running protection“ of pumps

- no mechanical parts, full electronical version
- for use in Ex-Zone 1

Order No.	Execution	Weight, kg
18 381	Flow detector analyzing device for connection to sensor, EExib II C, operating voltage 230 V/50 Hz AC, relay output: 1, for installation in electrical switch box	0,3
18 380	Flow detector analyzing device for connection to sensor, EExib II C, operating voltage 24 DC, relay output: 1, for installation in electrical switch box	0,3
18 384	Flow detector analyzing device with connection 1/2" NPT AG, EExib II C, Operating voltage 24 V DC, version: Eurocard-size 100x160 mm	0,3
18 382	Flow detector dip sensor for use in hazardous areas, case form stainless steel A4, art of protection IP68, with 2 m connection cable, ambient temperature -20 °C up to +85 °C, max. pressure – 60 bar	0,2
18 389	Welding half coupling 1/2" NPT, PN 40, for dip sensor, from steel ASTM 105	0,1

**Gas withdrawal valve with limit indicator PN 25 for LPG storage tank**

- case from brass
- tank connection 3/4" NPT-AG
- gas withdrawal connection POL-IG
- complete with pressure gauge, gauge and dip tube

Order No.	Type	Dip tube, mm	Weight, kg
18 024	489	250	1,5
18 025	489	310	1,5
18 026	489	463	1,5

Adaptor PN 40, for dip sensor

- for installation between two flanges
- material – steel H II

Executions:

- A – connection for sensor 1/2" NPT-IG
- B – connection for sensor 1/2" NPT-IG and additional connection 1/4" NPT-IG for one safety relief valve

Order No.		Nominal width, DN	Weight, kg

Version without printer

Version incl. printer

Version with TEX-Register

Complete measuring unit Type LC

- flow direction from left to the right
- BUNA seals
- include fastening base without ground plate
- execution for road tanker:
 - type MA-4 up to MA-15 – housing from alu
- execution for stationary units:
 - type MSA-15 up to MSA-120 – housing from steel

Equipment: Back check pressure valve in inlet (standard for MA-4 – MA-7), vapor eliminator with fine mesh filter, LC-Meter, mechanical counter Type VR with ticket printer, differential pressure valve. Combination options, spares and conversion parts on special request: electronic counter with ticket printer, flow direction from right to the left, with DIN-flanges, with pulser etc.

Main components of measuring units

Order No.	Description
38 395	Differential valve for LC meter, 2"
98 930	Electronic calculator type ME 3000
98 1631	TEX batch controller with MODBUS interface
38 466	Epson Slip printer TM-U295, 24 VDC, for TE550
38 4120	Trap with strainer (MID400-Version)

Order No.	Description
38 412	Trap with strainer (LC-Version)
38 444	Back check valve
98 6570	Coriolis mass flow meter DN 40 / 1½"
38 459	3-way solenoid valve
38 334	Impulse line for LC measuring units

FAS 98 1680**Measuring unit MID800-TEX**

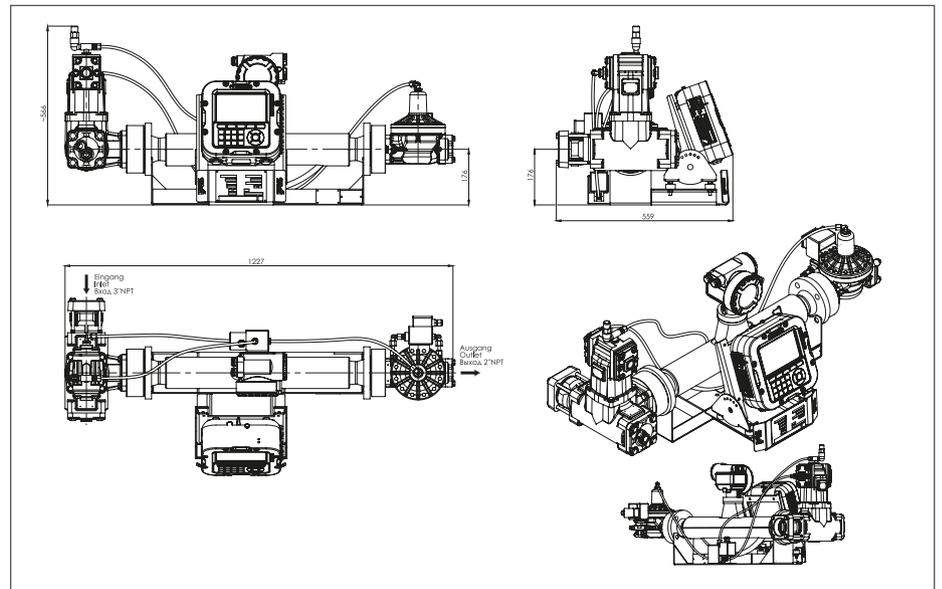

for LPG terminals and other LPG applications. The MID800-TEX unit is characterized by various advantages:

- measurement in mass (kilograms) and volumetric (liters);
- possibility of current accounting of density and temperature;
- delivery ticket free to configure;
- data transmission via MODBUS;
- remote control operation;
- external communication via serial cable, Ethernet, Bluetooth, Wi-Fi;
- big colored LCD-display;
- capacity up to 800 l/min;
- a large selection of operating languages;
- Inlet 3" NPT / Outlet 2" NPT F;
- TEX electronic register in Ex d design;
- designed for LPG (propane-butane), execution for other liquids – on request.

Measuring unit MID800-TEX consists of the following main components:

- *air separator incl filter;*
- *check valve;*
- *PROMASS mass flow meter;*
- *differential valve;*
- *pre-set equipment;*
- *printer for delivery tickets;*
- *solenoid valves (2 pc);*
- *base frame;*
- *TEX electronic register mounted on the plant;*
- *30 meters cable for data transfer to a remote printer;*
- *electric block for connecting 230 V AC and converting 24 V DC.*

MID-TEX measuring unit for LPG road tankers and LPG applications

- flexible configuration
- compact design
- big coloured display
- Coriolis mass flow meter
- data transfer via MODBUS possible
- LPG filling in mass (kg) and/or volume (l)
- density monitoring
- free to configure delivery ticket
- "app" data transfer
- remote control operation, external communication via serial cable, Ethernet, Bluetooth and WiFi
- Ex d-design of TEX register

FAS 98 1631 TEX Register

could be used in measuring systems for the following liquids:

- petrochemical business: crude oil, liquid hydrocarbons, industrial oil, LPG ect
- liquid food
- alcohol, ethanol ect
- chemical product in liquid forms
- distilled water, deionized water ect
- other liquids not listed

Please note: TEX-Register could be combined with

- all coriolis meters with MODBUS communication
- all liquid controls PD meters equipped with pulser

Additional components for MID-TEX measuring units for LPG road tankers

Separate execution

Coriolis mass flow meter for LPG

- measures in real time, independent on physical characteristics of fluids
- mass flow meter especially designed for analyses of viscosity, density, temperature and mass
- sparkling measuring accuracy, recording of several process sizes: mass flow density and temperature of fluids and gases
- cost-efficient, space-saving and maintenance free construction: no moving parts or seals
- incompatible with all established communication-protocols: HART, PROFIBUS DP / PA, MODBUS, etc.
- high anti-vibration stability, for example for operation on road tankers

For other mediums – on special request

FAS 93 9352 complete support-measuring unit

For draining of road tankers and business commercial registration of mass and/or volume devices (under consideration of real density and temperature of LPG), PN 25

- capacity up to 220 l/min
- steel sheet cabinet – 1200×1200×600 mm
- connections M60×4 (left) with ball valve
- 2-digits LCD display
- return pipe line – RVS 22 mm
- medium temperature -50 up to 125°C
- pump unit – FAS-Z 200 (220 l/min), mass flow meter – Promass 80E
- measuring data – density, temperature, flow
- totalizing counter for volume or mass

**FAS 93 9359 measuring unit in a cabinet construction**

- steel sheet cabinet – 2000×1600×500 mm
- medium temperature -50 up to 125°C
- in- and outlet connections flange DN 20 with ball valve
- 4-digits LCD display
- return pipe line RVS 22 mm
- vapor eliminator with filter
- differential pressure valve
- complete shut-off and safety fittings
- mass flow meter – Promass 83E
- Modbus RS 485-interface
- power supply 230 V
- measuring data – density, temperature, flow
- totalizing counter for volume or mass

**Test unit for verifying your metering equipment**

- max. flow – 1000 l/min
- connection: In / Out – 1½" ACME
- power supply – 230 V or 24 V
- coriolis mass flow meter
- electronic counter
- totalizer "kg" and "liter"
- density measurement

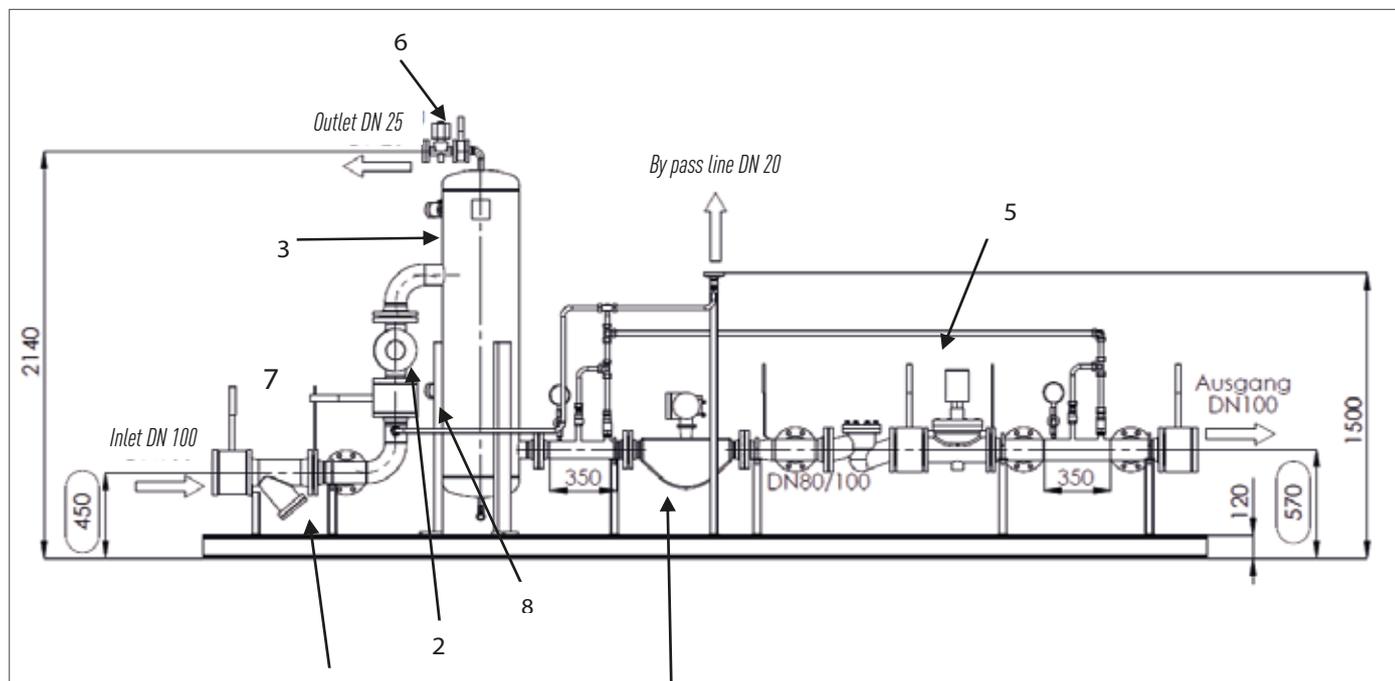

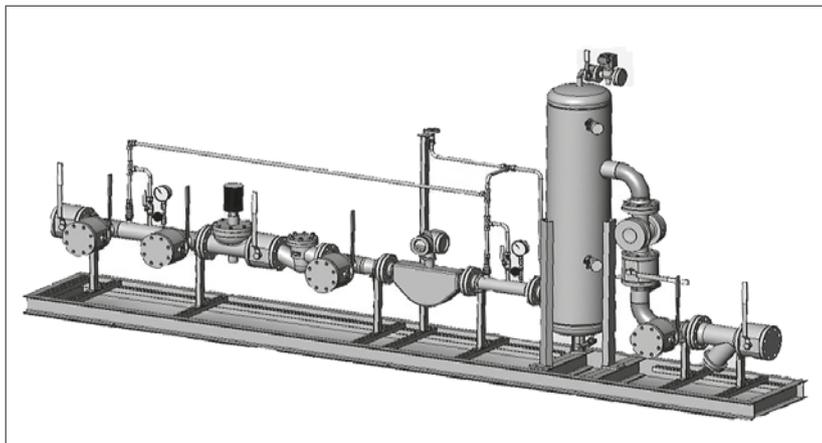

Order No.	Measuring rate, l/min	Maximum working pressure, PN	Inlet/ Outlet	Voltage, V	Weight, kg

FAS 93 1053 complete measuring line

- capacity up to 2500 l/min
- 2-digits LCS display
- in- and outlet connections flange DN 100
- power supply – 230 V
- measuring data – density, temperature, flow
- totalizing counter for volume or mass

Consisting of following main components:

- Strainer
- Sight flow indicator
- Vapor eliminator
- Mass flow meter
- Solenoid valves; ball valves; liquid level sensors

E

Vaporizers • Vaporizer units • Mixturing units

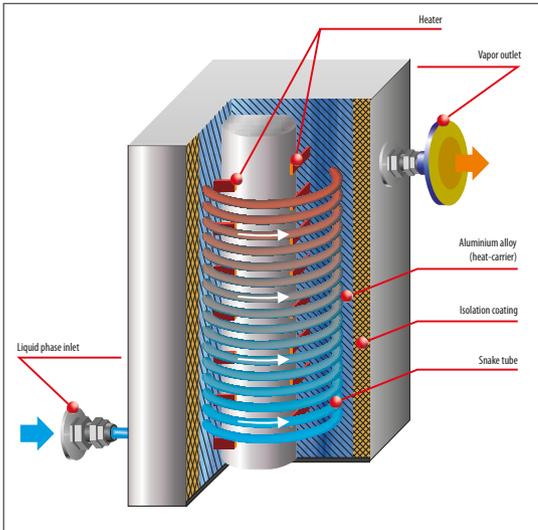

FAS vaporizers will be assembled generally as a facility and will be delivered as a complete ready unit.

Vaporizers and their components (trap, regulator etc.) will be mounted on a base frame, in a lockable vertical cabinet or container. This simplifies the selection of installation place both internally and externally. The regulation of the connecting pipe lines may vary depending on type, constellation and customer requests.

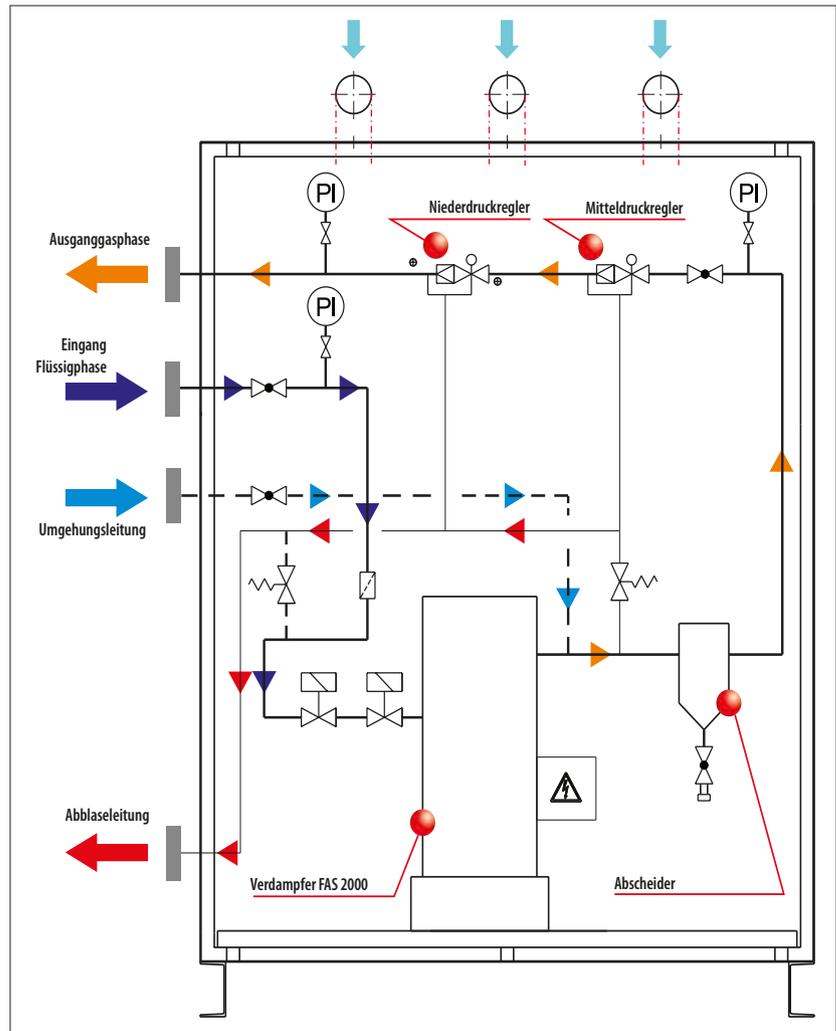

Vaporizers FAS 2000 are so called „Dry type vaporizers“ with indirect heating. An aluminium core with high heat conductivity is used as the heat transfer medium. This ensures short warm-up and reaction time.

The control of solenoid valves and of the heating will be realized means of temperature sensor on aluminium block, hereby safety operation of the unit will be ensured.

Operating diagram of dry type vaporizer FAS 2000

Typical diagram of vaporizer unit FAS 2000

Electrical dry type vaporizer FAS 2000

- electrical dry type vaporizer
- capacity – 15 kg/h
- gas temperature outlet – max. 70°C
- connection value – 4,4 kW (230 V, 14 A)
- max. operation pressure – 25 bar
- pipe screw connection
- inlet/outlet – 12 mm
- wire cross section – min. 2,5 mm²
- height – 350 mm
- weight – 25 kg

Order No.	Vaporizer type	Capacity, kg/h

Vaporizer Type FAS 2000 in a special industrial version

Will be used in nuclear industry, biogas production, technological production lines of a high degree of reliability, industrial testing facilities.

Main features:

- automated temperature control of the vapor phase in the specified parameters
- transfer of operating data
- "app" communication

Order No.	Vaporizer type	Capacity, kg/h
20 574	FAS-2000 i-32	32

Complete vaporizer units

Complete vaporizer units in cabinet construction ready for connection and consisting of:

- strainer in front of vaporizer (liquid line)
- liquid gas trap with possibility to install liquid level sensor
- regulator group (modification with duplication is possible)
- shut off fittings
- pressure gauges
- reserve gas line

Complete unit mounted in a steel cabinet and is ready for connection directly after the installation

Vaporizer unit in compact design

with tank and dry-type vaporizer Type FAS 2000, Ex-Zone 2, connection voltage single-phase alternating current 230 V/50 Hz, 3-phase current 400 V/50 Hz, complete mounted in steel sheet cabinet, piped, tank and cabinet are mounted on a galvanized ground frame, piped, ground- and painted.

Compact unit consisting of:

- steel sheet cabinet, painter, with rain protection roof, vents, console h=100 mm
- ball valve in in- and outlet as well as between trap and middle pressure regulator
- strainer with fine mesh filter and safety relief valve in front of dry-type vaporizer
- pressure gauge 0-25 bar with pressure gauge shut-off valve in front of and behind the middle pressure regulator
- dry-type vaporizer Type 2000 (see Order No. 20333, 20554-20556), for Ex-Zone 2, with 2 pcs. of solenoid valves at vaporizer's inlet, 1 safety relief valve at vaporizer's outlet, control box on vaporizer, wired ready for connection
- trap with emptying of remainders
- middle pressure regulator PN 25 with emergency shut-off valve (SAV) and connection with pressure tap (SBV) and pressure gauge
- LPG storage tank acc. to DIN 4680 (domestic tank), for over ground installation, for storage of LPG, with standard fittings
- ground frame in special execution
- excess flow valve
- by pass line from safety relief valves in vaporizer's cabinet

Execution:

- Outlet pressure 0,8 bar. Other setting pressures on request. Various adds-on such as step tread for operation of tank fittings, by-pass line with manual switching suitable for unit configuration are available on your request.

Vaporizer size	Tank size	Ground frame	Cabinet dimensions	Inlet	Outlet	Connection voltage	Connection value eL

	6400	5820×850×100					

Vaporizer FAS 3000 are generally designed for middle and large industrial consumers. They will be also used in mixing units for production of liquid gas-air-mixture (synthetic natural gas).

The effectivity of vaporizers FAS 3000 will be achieved through applications of welded plate heat exchangers especially designed for these purposes with a high efficiency factor as well as their potential to work with small temperature differences. The thermal transfer will be affected over curly plates from stainless steel, mounted in a package. Hot and cold sectors are alternating. Such construction ensures an affective system of heat exchange surface.

*Detailed view
of heat exchanger.
Special profiling to optimize
the heat transfer.*

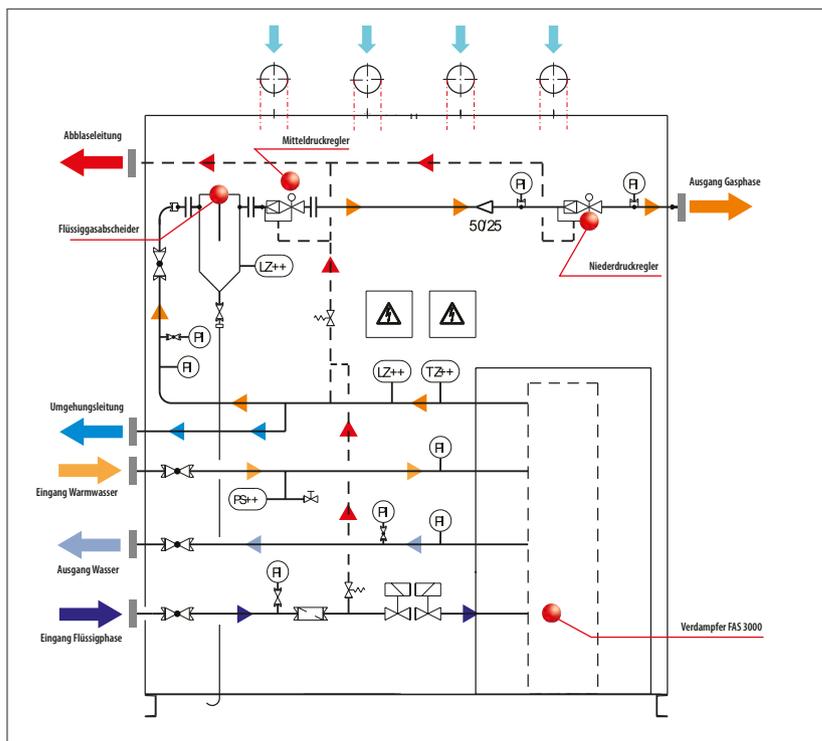

LPG vaporizer unit FAS 3000

- capacity – 200 kg/h
- outlet pressure – 50 mbar
- design pressure – 25/10 bar (gas/water)
- heat carrier temperature – 90/70°C
- power supply 230 V
- inlet connection DN 25 (liquid phase, by-pass line, discharge line, hot water)
- outlet connection DN 25/DN 50 (water, gas)
- dimensions – 1200×1200×400 mm
- weight – 255 kg

Scope of delivery

- Vaporizer FAS 3000
- Thermostat for gas temperature
- 2 liquid level sensors
- 2 solenoid valves in inlet of liquid phase
- Safety relief valve in liquid phase
- Thermometer
- Pressure switch in water space
- Liquid trap with ball valve for emptying
- Separate control box for mounting outside of Ex-zone
- Regulator unit: (middle pressure regulator, inlet pressure – up to 16 bar,
- Outlet pressure – 1,5 bar, low pressure regulator, outlet pressure – 50 mbar, emergency shut-off valve (SAV) and connection with pressure tap (SBV), pressure gauge

SNG Mixing plants (Propane-Air technology)

usually are used for replacement out natural gas. The use of SNG mixing plants FAS-LT (PROPANE-AIR Technology) allows consumers to completely switch to the use of propane-butane and not depend on the presence of natural gas in the pipeline.

The new generation of mixing plants FAS-LT (PROPANE-AIR Technology) meets the most stringent requirements and expectations of industrial users:

- *Wobbe-index control and management*
- *SIL2 safety monitoring and shutdown*
- *Reliable mixing cycle*
- *Capacity from 3 to 60 MW*
- *Outlet pressure – from 50 mbar to 3 bar SNG.*

FAS-LT mixer unit	Capacity, MW
FAS-LT 5	up to 5
FAS-LT 10	up to 10
FAS-LT 15	up to 15
FAS-LT 20	up to 20
FAS-LT 25	up to 25

FAS-LT mixer unit	Capacity, MW
FAS-LT 30	up to 30
FAS-LT 40	up to 40
FAS-LT 50	up to 50
FAS-LT 60	up to 60

Mixing Plants are mainly supplied in "placed on a steel frame" design. "Ready to use" container version is available.

Depending on the conditions and desires of the consumer, FAS-LT Mixing Units are supplied in combination with FAS 2000 or FAS 3000 evaporators.

Mixing plants FAS-LT are distinguished by the provision of conditions for safe mixing of gases:

- *emergency shutdown in case of any failure of the installation;*
- *comparison of the oxygen content calculated from the measured flow with the analyzed value and signaling, if necessary, switching in case of a critical deviation;*
- *SIL 2 Monitoring of the oxygen content in the gas mixture and shutting off the admixture of air in case of violation of the limit value;*
- *in the event of a main power failure, the valve and control valves close. The same thing happens if the controller fails. The shutdown chain occurs in the same way when limit values are violated that no longer allow the generation of the desired gas mixture, as well as when the device fails;*
- *the same thing happens when the measuring device fails in the gas mixing line. The sample gas flow for analysis is controlled by the minimum flow switch limit. Sample gas failure also triggers an alarm;*
- *if the gas analyzer fails, the control valves close;*
- *if the pressure regulator fails, the slam-shuts close. Gas pipelines are equipped with backflow protection devices.*

Mixing units can be designed in special configurations depending on conditions of a special object.

Turn key solutions for gas supply plants: LPG, SNG applications

Typical applications/users are:

- installations for the BIOGAS production plants (using LPG to increase calorific value),
- industrial consumers of natural gas (complete or partial replacement of natural gas with a mixture of propane-air (SNG))

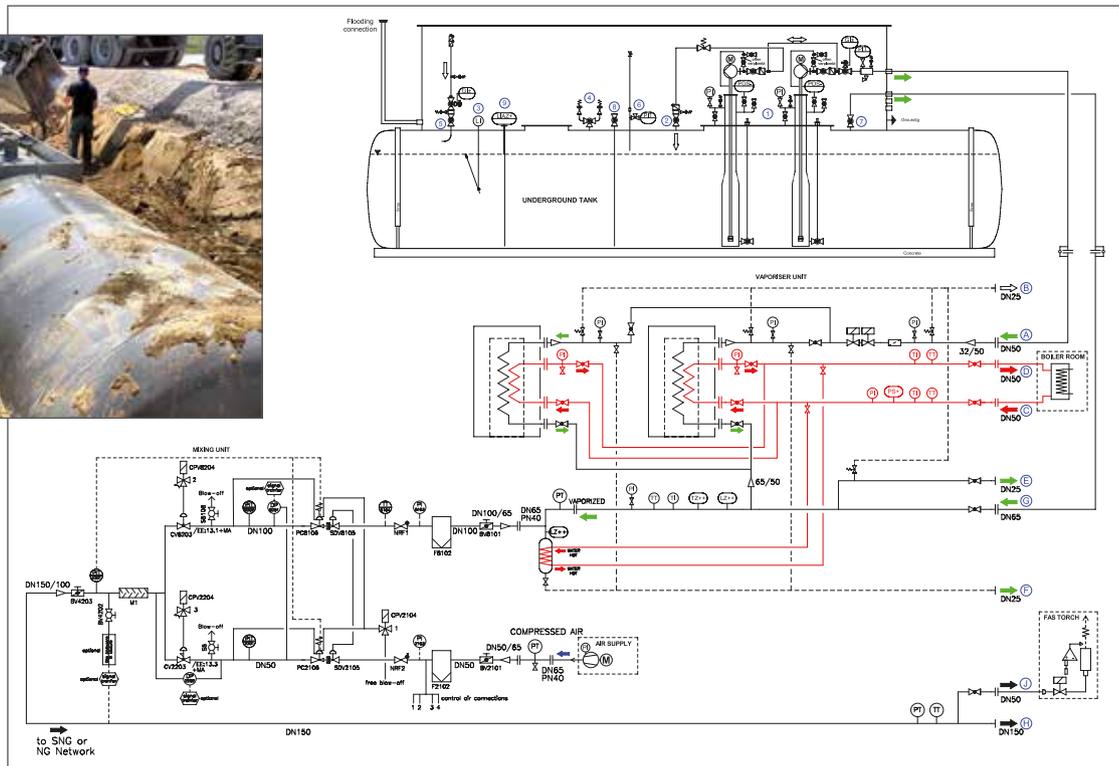

Complete project management:

- full support in a plants engineering;
- support in a permission activities;
- engineering support for civil works (land preparation, foundation, power supply, air supply, etc.);
- supply of a complete set of necessary equipment;
- installation and commissioning;
- training of operating staff;
- after-sales service.

MID-TEX measuring unit for LPG road tankers and LPG applications

- flexible configuration
- compact design
- big coloured display
- Coriolis mass flow meter
- data transfer via MODBUS possible
- LPG filling in mass (kg) and/or volume (l)
- density monitoring
- free to configure delivery ticket
- "app" data transfer
- remote control operation, external communication via serial cable, Ethernet, Bluetooth and WiFi
- Ex d-design of TEX register

FAS-Nr	Country-design	Version
98 1623	Germany	MID 400
98 1624	France	MID 400
98 1625	Turkey	MID 400
98 1626	Russia	MID 400
98 1627	Ukraine	MID 400
98 1628	Poland	MID 400
98 1629	Czech Republic	MID 400
98 1630	Kazakhstan	MID 400
98 1614	nv	MID800
98 1641	nv	MA7-TEX
98 1642	nv	MA15-TEX

Design for other countries by request available

Parameter	Marking	Unit	Value
Accuracy class	-	-	1,0
Max flow rate	Q_{max}	l/min; kg/min	450;220
Min flow rate	Q_{min}	l/min; kg/min	60;40
Minimum measured quantity	MMQ	L; KG	50;25

FAS 98 1631 TEX Register

could be used in measuring systems for the following liquids:

- petrochemical business: crude oil, liquid hydrocarbons, industrial oil, LPG ect
- liquid food
- alcohol, ethanol ect
- chemical product in liquid forms
- distilled water, deionized water ect
- other liquids not listed

Please note: TEX-Register could be combined with

- all coriolis meters with MODBUS communication
- all liquid controls PD meters equipped with pulser

Additional components

for MID-TEX measuring units
for LPG road tankers

Order No.	Description
98 6341	Temperature sensor PT100 for TE550/TEX excl. calibration
98 6342	Temperature sensor PT100 for TE550/TEX incl. calibration
98 1800	Flange with 2 holes for measuring pockets
93 1920	PRESET Set for measuring system MID 400
93 1925	FAS PRESET Set for measuring system MID 800

FAS Hose Reel with pneumatic drive, Type VIP 40, PN 25

- Road tanker version in ALU – light-weight design,
- For LPG high pressure pipe line DN 32
- Hose length max. 40 m
- Inlet left-hand DN 40
- Outlet right-hand 1 1/4" NPT IG (hose connection)
- Regulation: push lever valve
- Bracket for road tanker connection 1 3/4 ACME
- Completely mounted and tested for functioning

Order No.	LPG-hoses Type	Weight, kg
24 3426	DN 32 max. 40 m	41,60

**Supply options:**

- Including the LPG-Hose
- Including the measuring
- System LPG-Control MID 400

**Hose reels Type Hannay Reels**

with hand crank

- LPG high-pressure hoses LPG 25 / LPG 32
- hose connection – G1/4" male
- inlet – 1 1/2" NPT female
- swivel joint 90°
- completely mounted on base frame, primed and painted

Type:

- A – inlet and drive right-hand
- B – inlet and drive left-hand

Hose reels Type Hannay Reels

with pneumatic drive

- LPG high-pressure hoses LPG 25 / LPG 32
- hose connection – G1/4" male
- inlet – 1 1/2" NPT female
- swivel joint 90°
- completely mounted on base frame, primed and painted

Type:

- A – inlet and drive right-hand
- B – inlet and drive left-hand

Order No.		Type of LPG high pressure hoses	Weight, kg
Type A	Type B		
24 331	24 332	LPG 25 (up to 44 m) LPG 32 (up to 38 m)	50,0
24 333	24 334	LPG 25 (up to 60 m) LPG 32 (up to 50 m)	57,0

Order No.		Type of LPG high pressure hoses	Weight, kg
Type A	Type B		
24 341	24 342	LPG 25/32 (up to 44/38 m)	60,0
24 343	24 344	LPG 25/32 (up to 60/50 m)	68,0

Hose reels Type Hannay Reels with hydraulic drive

- hydraulic drive
- LPG high pressure hose LPG 25 and LPG 32
- inlet – 1½" NPT female
- swivel joint 90°
- completely mounted on base frame, primed and painted

Type:

- A – inlet and drive right-hand, hose connection G 1¼" male
- B – inlet and drive left-hand, hose connection G 1¼" male
- C – inlet and drive left-hand, hose connection 1¼" NPT male
- D – inlet and drive right-hand, hose connection 1¼" NPT male

Order No.				Type of LPG high pressure hoses	Weight, kg
Type A	Type B	Type C	Type D		
24 361	24 362	24 365	24 366	LPG 25 (up to 44 m) LPG 32 (up to 38 m)	62,0
24 363	24 364	24 368	24 367	LPG 25 (up to 60 m) LPG 32 (up to 50 m)	68,0

Tandem hose reels Type Hannay Reels

- left reel for LPG high-pressure hose LPG 25 for a length up to 40 m, with swivel joint 90°, inlet 1½" female NPT and hose connection 1" female NPT
- right reel for LPG high-pressure hose LPG 13 for a length up to 40 m, with swivel joint 90°, inlet 1" female NPT and hose connection ½" female NPT
- completely mounted on a base frame, primed and painted

Type:

- A – with hand drive
- B – with pneumatic drive
- C – with hydraulic drive

Order No.	Type	Weight, kg
24 356	A	92,0
24 329	B	106,0
24 351	C	110,0

Complete high-pressure hose line

suitable for hose reel

- complete with hose connections on both sides
- inlet flat seal with union nut
- outlet – male NPT thread

Type:

- A – Length 40 m
- B – Length 50 m

Order No.		LPG-Hose length	Connection, "		Weight, kg	
Type A	Type B		Inlet	Outlet	Type A	Type B
24 005	24 014	25	G 1¼"	1 NPT	42,0	52,0
24 006	24 015	32		1½" NPT		

3-way ball valve PN 63

- truck version
- from stainless steel
- welding ends
- housing and shaft from 1.4401
- temperature – -30 up to +180°C

Order No.	Size, DN, "	Weight, kg	Length, mm
19 2311	DN 15, ½"	0,60	75
19 2321	DN 20, ¾"	0,90	80
19 2330	DN 25, 1"	1,40	90
19 2350	DN 40, 1½"	2,90	125

Order No.	Size, DN, "	Weight, kg	Length, mm
19 2360	DN 50, 2"	4,70	150
19 2370	DN 65, 2½"	10,30	185
19 2380	DN 80, 3"	15,30	205
19 2390	DN 100, 4"	24,60	240

**Cable drum type FAS**

- cable and earthing clamp
- spring rewind, lockable in any position
- cable material – copper cable cross section 2,5 mm²

Order No.	Type	Cable length, m	Weight, kg
24 321	open execution	50	17,6
24 322	open execution	25	7,0
24 019	closed execution	30	7,0

Quick-acting shut-off valve PN 25

- angular
- material – steel
- open position with locking device
- outlet with vent valve

Order No.	Type RegO	Execution	Inlet/outlet	Weight, kg
13 021*	A7708 L	angle form	1" NPT / 1" NPT	1,6
13 022*	A7707 L	straight form		1,7

**Quick-acting shut-off valve PN 25**

- with safety filling device

Order No.	Type	Inlet/outlet	Lock	Weight, kg
13 018	RegO/FAS	1" NPT IG / 1 1/4" ACME	+	2,9
13 031	RegO/FAS		-	2,9

**Quick-acting valve PN 25**

- material – steel
- with safety filling device
- closing position with lock
- suitable for LPG and ammonia

Order No.	Type RegO	Execution	Inlet/outlet	Weight, kg
13 0351	A7793 A	angle form	3/4" NPT / 1 1/4" ACME	2,9
13 035	A7797 A	angle form	1" NPT / 1 1/4" ACME	2,8

**Excess flow valve PN 25 for road tankers**

- of stainless steel 1.4541
- 2" female NPT connection on both sides
- for installation in front of hose reel

Order No.	Type	Capacity (liquid phase), l/min	Weight, kg
24 013	FAS 697-2	1210	2,5

Wheel block as rolling protection

for road tankers up to 40 tons gross weight

- stainless steel
- mechanical switch EEx dII C T6, 250 V AC/6 A respectively 24 V DC/4 A Ex-proof
- cable connecting end length = 10 m
- flexible plastic protection hose

Order No.	Execution
24 191	In case of interruption of contact, e.g. in case of rolling of the tank truck, the stop of the filling process is effected by the quick-acting shut-off equipment, respectively by the emergency stop system

Pneumatic actuator for RegO internal valves

Order No.	Type RegO	Connection, "
24 137	A3209 PA	1 1/4
24 138	A3212 PA	2
24 139	A3213 PA	3

Hand pump

for RegO internal valves with hydraulic control

Order No.	Execution	Weight, kg
24 751	Type Whessoe 7012, connection – 1/4" BSP, with oil tank, max. oil pressure 80 bar	15,0

Line housing

for pneumatic internal quick-acting valves type Whessoe

- for installation in pipelines
- steel body with reinforced bolts
- flange connection according to ASME/ASA, Class 300

Order No.	Connection, "	Max. pressure, bar	Weight, kg
24 731	2	30	20,0
24 732	3		31,0
24 733	4		50,0
24 734	6		73,0

Type 6240

**Internal withdrawal-quick acting valve (type Whessoe)**

- additional body for pipe lines
- automatically close
- with hydraulic or pneumatic control system (min. 5 bar)
- body of ASTM A352 Grade LCB, chromed steel cylinder and pistons, spring of stainless steel
- connection auxiliary energy 3/8" NPT

Type 6139

Type:

- A – type 6239, for pneumatic control, flange connection to DIN 2635, with approval according to EEC directive 94/55/CE, not available, only spare parts
- B – type 6239, for pneumatic control, flange connection according to ANSI/ASA RF, not available, only spare parts
- C – type 6139, from 8" type 6240, for hydraulic control, flange connection according to ANSI/ASA RF

Ball valve PN 40

with full bore with electrical actuator

- "Fire-Safe" version acc. to BS6755 part 2
- type with flanges – Type FAS-KHF
- type compact – Type FAS-KHB
- body – of steel ASTM A105
- ball – of stainless steel (CrNi AISI 304)
- seals – of PTFE
- leakproof class 1 acc. to DIN 3230
- electrical actuator – AUMA NORM SGEXC

**Quick-acting ball valve PN 40**

with full bore

- "Fire Safe" version acc. to BS6755 part 2 and antistatic device
- flanges acc. to DIN 2635
- seals – of PTFE
- leakproof class 1 acc. to DIN 3230
- with pneumatic actuator in maintenance free compact execution, angle of rotation 90°, with automatic spring return, 5-8 bar, min. pilot pressure of 5 bar (at a max. differential pressure of 25 bar)

Type:

- A – type ARGUS, body of forged steel TSTE 355N, ball and shaft of stainless steel, shaft seal of Viton
- B – type ALFA, body of forged steel ASTM A 105 (C 21), ball and shaft of stainless steel, shaft seal of PTFE/Viton
- C – type Bont, body of forged steel ASTM A 105 (C 21), three-piece body, ball and shaft of stainless steel, shaft seal of PTFE/Viton

Quick-acting ball valve

- DIN-flange connection on both sides
- length acc. to DIN 3202
- F4/F5 short model

Type:

- A – with emergency shut-off valve for upper limit switch
- B – with emergency shut-off valve for upper and lower limit switches and relief valve, relief valve connection for pressure tap, vent pressure permanently set 30 mbar above outlet pressure

Safety relief valves

Safety relief valve

- spring-loaded relief valve
- thread connection
- plastic protection cap
- body of brass

Check device for safety relief valves

- for exchange of relief valves without emptying of tank
- seal
- body of brass

Back pressure check valve PN 40

- for installation between two flanges
- soft seal

Type:

- A – housing material 1.4317, soft seal made of viton, for propane / butane
- B – housing material 1.4317, soft seal made of viton, for propane / butane, with type approval
- C – housing material 1.4552, with PTFE-special seal for DME, refrigerant and NH₃, with type approval

Safety breakaway coupling for cars dispensers PN 25

- housing from brass
- to protect the pipe line in case of accidental, accident-related demolition of dispenser,
- valve self-closing, in separated position closed on both sides, release by shell with breaking point,
- not reusable after draw

Commitment purposes acc. to DIN EN 14678-1 Point 4.4.1.2

Documentation: GIP, Type SBK with DVGW-test

Safety breakaway coupling for trucks – LPG dispensers PN 25

- housing from brass; completely with 2 pcs.
- clamping jaws made of alu
- for correct installation on ground frame of dispenser
- further features as described before

Documentation: Declaration of Conformity acc. to ATEX-guidelines

Male part

Female part

In coupled position (thread execution)

Quick-acting dry breakaway coupling PN 25 for loading / unloading of rail / road tankers

- body of stainless steel 1.4408
- with NBR flat compression seals; with cam lever

14 130	DN 100	12,5	350	31,7
26 130	Extra charge for level sensor (PN 25, connection 1" NPT male, approved for use in hazardous locations, Zone 0, with PTB-type approval, length of sensor: 66,5 mm)			
26 301	Extra charge for isolating switch amplifier (with intrinsically safe input and relay output, 1-channel)			
14 120	Extra charge for sealing of level sensor including pressure test			

**Filling device PN 25**

- for methanol
- order No. – FAS 14 085
- weight – 7,2 kg

Consisting of:

- Adapter, brass, 1 3/4" ACME with pin, for attachment to filler valve
- Shut-off valve, brass, 3/4" NPT
- Vent valve, brass, 1/4" NPT
- Methanol-pressure vessel, nominal capacity approx. 2 l
- Plug
- High-pressure LPG hose DN 10, length approx. 2 m
- Swivel POL adaptor for connection to service valve for gas withdrawal

Drain device

for draining of water from stationary pressure tanks

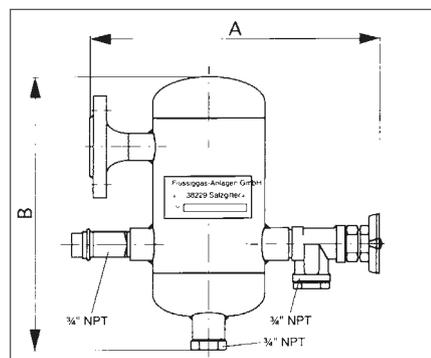

- volume approx. – 4 liters
- inlet flange acc. to DIN 2635
- primed and painted

Type:

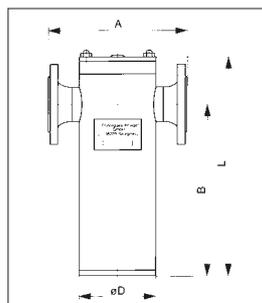

- A – Angle valve of brass, 3/4" NPT with plug, relief valve of brass, type approval, 3/4" NPT, set pressure 25 bar
- B – Ball valve of steel, 1/2" NPT with plug, relief valve of stainless steel, type approval, 1/2" NPT, set pressure 25 bar

Fittings for refilling facilities • Swivel joints • Loading arm stations

Liquid and vapor transfer hose system in full hose system PN25

- standard connections for road tankers
- respectively for rail tankers
- tested at a hydrostatic pressure of 37,5 bar

Type:

- A – Length 4 m
- B – Length 5 m

Order No.		Execution
Type A	Type B	

Filler hose for road tankers with safety relief valve 25 bar and venting device

25 021	25 221	High-pressure hose LPG 80, connections: one side ball valve DN 65 PN 40 with coupling 3/4"ACME with union nut and plug of brass, other side flange DN 80 PN 40 to DIN 2635
25 022	25 222	High-pressure hose LPG 50, connections: one side ball valve DN 50 PN 40 with coupling 3/4"ACME with union nut and plug of brass, other side flange DN 50 PN 40 to DIN 2635

Vapor transfer hose for road tankers

25 023	25 223	High-pressure hose LPG 80, connections: one side ball valve DN 65 PN 40 with coupling 2 1/4"ACME with union nut and plug of brass, other side flange DN 50 PN 40 to DIN 2635
25 024	25 224	High-pressure hose LPG 32, connections: one side ball valve DN 32 PN 40 with coupling 2 1/4"ACME with union nut and plug of brass, other side flange DN 32 PN 40 to DIN 2635

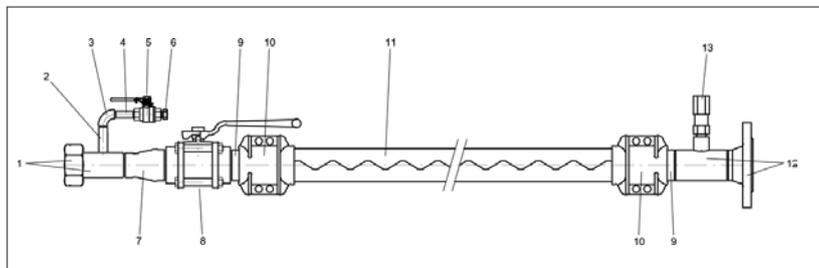

Filler hose for rail tankers with safety relief valve 25 bar and venting device

25 031	25 231	High-pressure hose LPG 80, connections: one side ball valve DN 65 PN 40 with lapped DIN flange DN 80 PN 40 and installed blind flange, other side flange DN 80 PN 40 to DIN 2635
--------	--------	--

Vapor transfer hose for rail tankers without safety relief valves 25 bar and venting device

25 032	25 232	High-pressure hose LPG 50, connections: one side ball valve DN 50 PN 40 with lapped DIN flange DN 50 PN 40 and installed blind flange, other side flange DN 50 PN 40 to DIN 2635
--------	--------	--

Complete hose system for applications in CIS and Baltic states

FAS 25 027 LPG-filling hose DN 50 in full hose system

Order No.	Execution
25 027	LPG-filling hose DN 50 in full hose system with safety relief valve and tension release, length = 4 m, connections: ball valve DN 50 PN 40 with union nut M60×4 and plug on one side, other side flange DN 50 PN 40 to 2635, completely mounted
25 028	LPG-filling hose DN 50 in full hose system with safety relief valve and tension release, length = 4 m, connections: ball valve DN 50 PN 40 with union nut M60×4 and plug on one side, other side union nut M60×4, completely mounted
25 029	LPG-filling hose DN 50 in full hose system with safety relief valve and tension release, length = 5 m, connections: ball valve DN 50 PN 40 with union nut M60×4 on one side, other side flange DN 50 PN 40 to 2635, completely mounted
25 030	LPG-filling hose DN 32 in full hose system with safety relief valve and tension release, length = 10 m, connections: ball valve DN 32 PN 40 with union nut M60×4 and plug on one side, other side flange DN 32 PN 40 to 2635, completely mounted
25 037	LPG vapor transfer hose DN 32 in full hose system with safety relief valve and tension release, length = 4 m, connections: ball valve DN 32 PN 40 with union nut M60×4 and plug on one side, other side flange DN 32 PN 40 to 2635, completely mounted
25 039	LPG vapor transfer hose DN 32 in full hose system with safety relief valve and tension release, length = 7 m, connections: ball valve 1 1/2" with union nut M60×4 and plug on one side, other side flange DN 32 PN 40 to 2635, completely mounted
25 042	LPG-filling hose DN 50 in full hose system with safety relief valve and tension release, length = 7 m, connections: ball valve DN 50 PN 40 with union nut M60×4 and plug on one side, other side flange DN 50 PN 40 to 2635, completely mounted
93 016	Complete LPG high pressure hose line DN 50, PN 25, 2", electrical conductivity, temperature range: -40 up to +70°C, hose length = 4 m, connections: flange DN 50 PN 40 with ball valve DN 50, PN 40 on one side, other side flange DN 50 PN 40 to 2635, safety relief valve, excess flow valve, flange outside for welding
93 018	Complete LPG high pressure hose line DN 50, PN 25, 2", electrical conductivity, temperature range: -40 up to +70°C, hose length = 4 m, connections: flange DN 50 PN 40 with ball valve DN 50, PN 40 on one side, other side flange DN 50 PN 40 to 2635, safety relief valve, excess flow valve, flange outside for welding

FAS 93 6808 complete hose cabinet for road tankers

FAS 93 680

FAS 93 6808

Liquid line: right

- M60×4 with cap
- pressure gauges with shut-off valve
- ball valve 1/2" NPT
- ball valve DN 50

Vapor line: left

- M60×4 with cap
- pressure gauges with shut-off valve
- ball valve 1/2" NPT
- ball valve DN 25

**Torch for safe burning**

of vapor and liquid LPG (Order No. FAS 25 290)

- 3 removable supports, with brackets for fixing
- automatic ignition device and flash back arrestor
- 20 meters cable with plug
- solenoid valve 230 V 50 Hz in inlet
- connection 1 3/4" male ACME
- total height approx. 3500 mm, space required for erection approx. 9 m²

Loading arm station PN 25 type FAS-G5

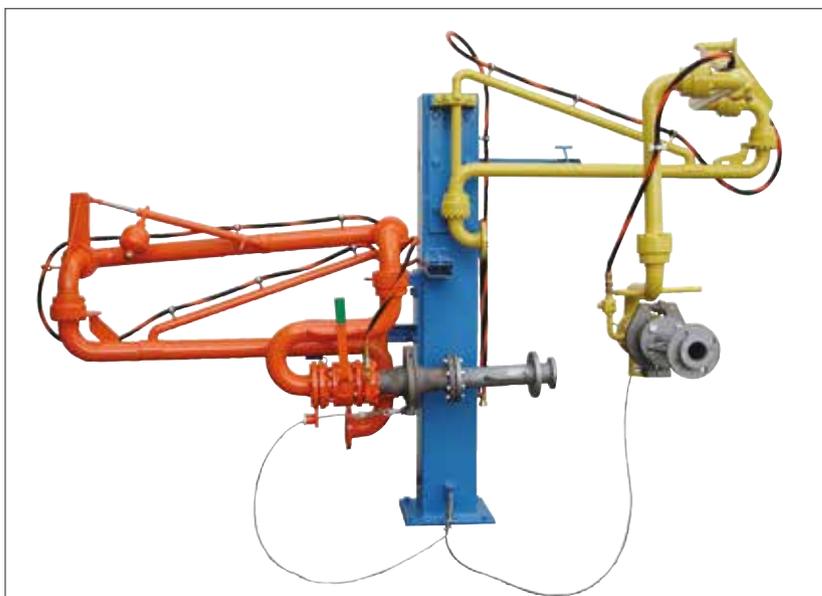

for the unloading of road tankers or rail tankers

- two product arms (liquid and vapor phase)
- connection for road tankers or rail tankers
- 10% X-ray of welding seams
- completely mounted and primed

Type:

- A – for Propan/Butan
- B – for Ammonia NH₃

Loading arm stations with other dimensions and ANSI-connections for other media on request.

Order No.		Execution
Type A	Type B	
25 302	25 307	Road tanker
25 304	25 309	Rail tanker
Additional Service		
25 392		Painting of the complete loading arms station
25 399		X-ray 100% of welding seams

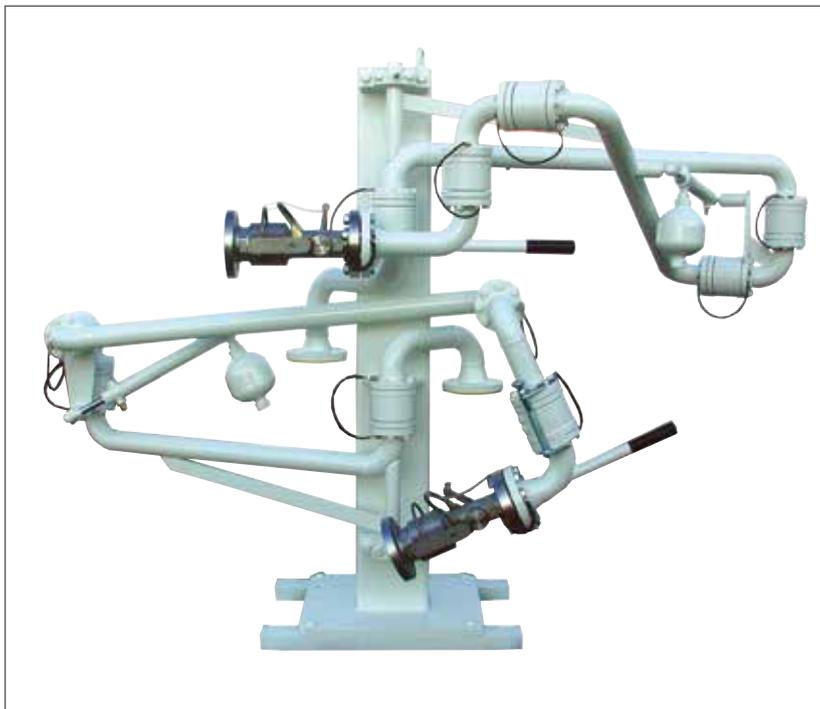

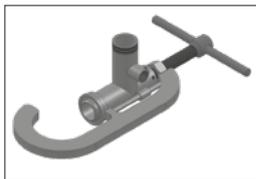

Loading Arm Station

- Loading arm DN 80 (liquid phase), connection road tanker: coupling 3 1/4" ACME with union nut and blind plug
- Loading arm DN 50 (vapor phase), connection road tanker: coupling 2 1/4" ACME with union nut and blind plug
- Flanged ball valve DN 50 and DN 80, Fire-safe acc. to BS 6755 Part 2
- ERC-safety breakaway coupling DN 50 and DN 80 with release system
- Ball valve 1/2" NPT for tension release, vent hose line LPG 10 for propane / butane or flexible stainless steel hose line for ammonia NH₃
- Support column with thrust bearing system and 2 parking position locks
- Hydraulic/pneumatic balance system for easy operation and handling

Flexible loading arm Type FAS

for unloading of rail tankers
(execution for Russia)

- 3 pcs. per rail tanker

Order No.	Execution
93 268	Basic version: lapped flange DN 50, PN 40, socket 1 1/2" NPT – 2 pcs., flexible hose of stainless steel DN 40, PN 25, length 6 m, ball valve DN 40, PN 63, filling connection for rail tankers
Additional accessories	
12 081	Excess flow valve 2", Type FAS, 166 I, PN 40
13 135	Breakaway coupling for hoses, PN 25, 2" female NPT on both sides

Loading arm station PN 25, Type FAS-G4, Order No. – FAS 25 466

for loading and unloading of road tankers

- two loading arms (liquid and vapor phases)
- 100% X-ray of welding seams
- completely mounted and primed
- execution – TKW

Equipment:

- Two loading arms DN 50, connection liquid phase with coupling 3 1/4" ACME with union nut and blind plug, connection vapor phase coupling 2 1/2" ACME with union nut and blind plug
- Flanged ball valve DN 50 PN 40, Fire-safe acc. to BS 6755 Part 2
- ERC-safety breakaway coupling DN 50 with release system
- Ball valve 1/2" NPT with hose line LPG 10 for venting
- Support column with thrust bearing system and 2 parking position locks

Loading arm station PN 25, Type FAS-G7,

for loading and unloading of road tankers or rail tankers

- with one product arm (liquid phase)
- completely mounted and primed
- 10% X-Ray of welding seams

Type:

- A – for Propan/Butan
- B – for Ammonia NH_3

Equipment:

- Loading arm DN 80/DN 50 for road tanker, connection ACME-coupling with union nut and blind plug or respectively connection lapped flange with blind flange for rail tankers.
- Flanged ball valve DN 50 or DN 80, Fire-safe acc. to BS 6755 Part 2
- ERC-safety breakaway coupling DN 50 with release system
- Ball valve 1/2" NPT for tension release, vent hose line LPG 10 for propane / butane or flexible stainless steel hose line for ammonia NH_3
- Support column with thrust bearing system and 2 parking position locks
- Hydraulic/pneumatic balance system for easy operation and handling

Order No.		DN	Execution	Connection
Type A	Type B			
25 451	25 468	80	TKW	3/4" ACME
25 452	25 469	80	EKW	DN80
25 401	25 464	50	TKW	2 1/4" ACME
25 402	25 465	50	EKW	DN50
25 519	-	80	FAS-RFP	DN50
25 520	-	50	FAS-RGP	DN50
25 521	Swivel joint 90°, connections 1 1/2" x 1 1/2" female NPT, with corrosion resistant metallic seal, max. operation pressure 25 bar, min. temperature -40° C			

Additional service

25 391	Extra charge for painting of complete loading arm station
25 398	X-ray 100% of welding seams

**Swivel joint PN 40,
3-piece body**

- straight construction of steel
- welding ends on both sides
- seals of PTFE

Order No.	Size, DN	Length, mm	Weight, kg
25076	DN 50	170	8,8
25078	DN 80	175	12,0

Due to this 3-piece construction an exchange of the swivel joint head is possible without difficulties.

**Swivel joint PN 40,
2-piece body**

- straight construction
- welding ends on both sides
- seals of PTFE

Type:

- A – of stainless steel for ammonia NH₃
- B – of steel for propane / butane

Order No.		Size, DN	Length, mm	Weight, kg
Execution A	Execution B			
25 064	25 084	DN 32	90	3,5
25 066	25 086	DN 50	145	7,2
25 068	25 088	DN 80	155	11,8

Swivel joint PN 25

for hose and pipe connections

- seals of PTFE

Type:

- A – angular construction 90°, steel, both sides female NPT
- B – straight construction, steel, both sides female NPT
- C – straight construction, steel, one side female NPT, other side male NPT male

Road tanker connection

(FAS-98124), PN 25, for liquid gas line of any LPG filling station

- connection M60×4 left, male with welding end DN 50
- welded neck flange DN 50
- cap M60×4 left, female
- weight – 2,9 kg
- completely welded, primed, painted and mounted

**Road tanker connection**

(FAS-98 127), PN 25, for liquid gas line of any LPG filling station

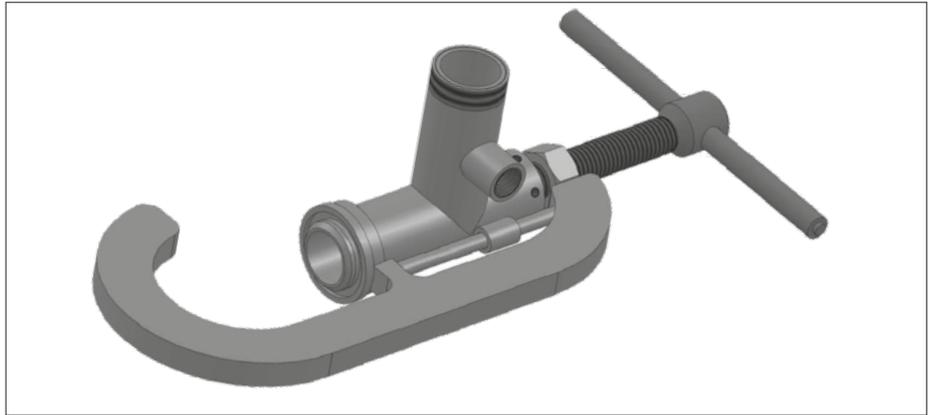

- connection M60×4 left, male with welding end DN 50, reducer DN 80 / DN 50
- welded neck flange DN 80
- cap M60×4 left, female
- weight – 5,9 kg
- completely welded, primed, painted and mounted

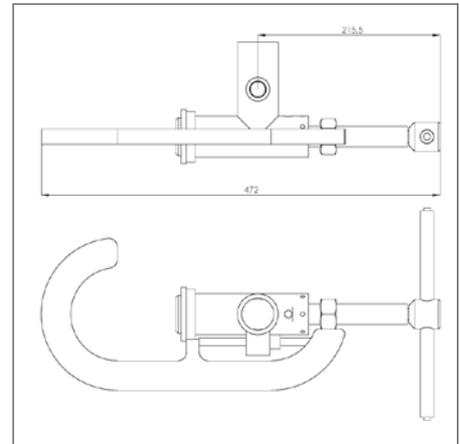

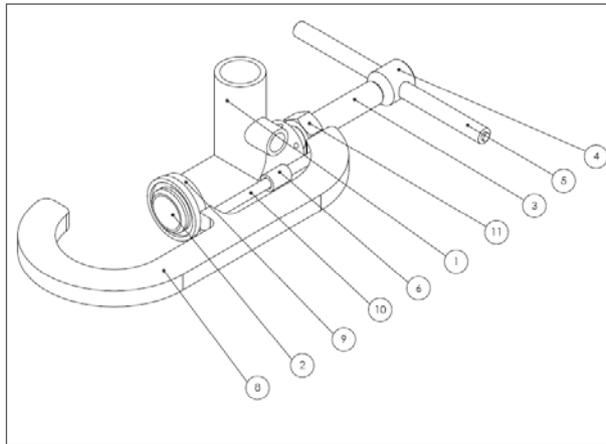

Filling connection

type FAS-RKSW-III (FAS-25522) for fixation of LPG-filling line to GUS-LPG-rail tankers

- for liquid and vapor phase
- without locking facility
- thread-less connection to rail tanker's side, with O-ring, pipe line side connection 1½" male NPT
- galvanized and tested for functioning

**Parts list**

- 1. Socket 1" NPT
- 2. Coupling
- 3. Spindle
- 4. Guide arm
- 5. Handle
- 6. Guide shell
- 7. Grease nipple M 10.1
- 8. Bracket
- 9. Guide ring
- 10. Guide pin
- 11. Guide screw nut

P

Equipment for filling of LPG cylinder

WAER 100 ex/e filling scale

Calibratable filling scale with electronic weighing technique in explosion-proof execution.

- maximum weight capacity – 100 kg
- with pivoting terminal

Available design:

- Stand alone operation
- Container operation
- Conveyor/carousels operation

Main parameters:

- Max working pressure: 25 bar
- In/Output: W21,8 × 1/14 left
- Filling weight: 50 kg

Additional equipment

FAS Nr	Execution
23 010	Gallows for filling scales
23 006 0	Spring balancer
23 007	Hinged platform
23 008	Strainer, DN 9 (PN 100, W21,8 × 1/14 left)

FAS Nr	Execution
23 009	High pressure hose line DN10 (PN 25, L=1,75 m; W21,8 × 1/14 left)
23 258 5	Data collection system NLT V1.0 (radio)
23 258 3	Data collection system (cable)

WER 100 ex – electronic check scale

for check of filling weight of cylinders.

Available design:

- Stand alone operation
- Container operation
- Conveyor/carousels operation

Main parameters:

- E-supply: 230 V/50 Hz
- Max weight, total: 100 kg
- Tara weight max: 50 kg

23 292 7	CLICK ON	for 21 mm valves	W21,8 × 1/16 L-21
23 292 3	CLICK ON	for 22 mm valves	W21,8 × 1/16 L-22
23 292 1	CLICK ON	for 27 mm valves	W21,8 × 1/16 L-27
23 292 4	CLICK ON	for 35 mm valves	W21,8 × 1/16 L-35

Pneumatic operated filling head

FAS Nr	Type	Design	Connections
23 016	6124	for valves with male thread	W21,8 × 1/16 l
23 874 6	CLICK ON	for 20 mm valves	G 3/8"
23 073 0	CLICK ON	for 22 mm valves	G 3/8"
23 313	JUMBO	for 35 mm valves	G 3/8"
23 313 9	CLICK ON	for 21 mm valves	G 3/8"

Pump for liquid and vapor propane-butane

FAS Nr	Type
Special piston pump for liquid and vapor propane-butane. Compressed air is needed for operation. Requested air pressure – 6 bar. Air consumption – 800 l/min	
23 033 2	NISPLV3
23 033	AAD-5
Manual operated transferring pump, maximum working pressure – 25 bar, inlet – 1" NPT, outlet – 3/4" NPT	
23 035	FAS

Hand operated leak testing unit Type MDV 1

- Testing process – trough wather filled device
- FAS Nr – 23 335

Full automatically leak testing unit

- For operation in conveyor and carousels filling stations
- Testing process – infrared sensors
- No operation personal

FAS Nr	Type
73 423 1	AEDa
23 796	AEDi

Hand operated leak testing unit Type MED 1

- Testing process – infrared sensors
- FAS Nr – 23 110

Hand operated shrinking mashine Type MS

- Shrinking process – trough hot air flow
- Air consumption – 700 l/min
- Air pressure – 6 bar

FAS Nr	Type	Electric capacity, kWt
23 169	MS 1	3,25
23 169 5	MS 2	5,00

Automatically shrinking mashine Type AS2

- Designed for operation in conveyor or carousels stations
- Shrinking process – trough hot air flow
- Air consumption – 700 l/min
- Air pressure – 6 bar

LPG evacuation unit

FAS Nr	Number of cylinders	Pump	Design
23 058	1	Hand	Fix frame
23 031	2	Pneumatic	Fix frame
23 343	3	Pneumatic	Rotating frame
23 346	4	Pneumatic	Rotating frame
23 331	5	Rotating frame	

High capacity evacuation unit

- For evacuation of LPG (liquid + vapor) cylinders
- Number of cylinder – 8/12/15/20/25
- Ready to use mounted on stable frame

Complete unit consist of

- Compressor unit CORKEN 91 or Corken 291
- Two tanks for tanks of vapor and liquid form of LPG
- E-control box
- Internal pipe line system for easy and safe operation

Mobile evacuation unit

- Designed especially for evacuation and refueling of car LPG cylinder
- FAS Nr. – 23 952

Consist of:

- LPG tank, volume 100 liter
- Pneumatic pump (requested air capacity ar 500 l/min). Air compressor excl.
- LPG high pressure hose incl filling nozzle
- Internal pipe system for easy and safe operation

Complete “ready to use” LPG cylinder refueling station

For easy and safe refueling of LPG cylinders in small quantity. Filling scale and evacuation unit mounted in steel cabinet.

Consist of:

- Filling scale (max 2 pcs)
- Evacuation unit with hand operated pump
- Steel cabinet
- LPG tank (option) in requested capacity
- LPG pump in high differential pressure version
- LPG dispenser (option) in requested version

**Complete “ready to use” LPG cylinder refueling station in container version**

For easy and safe refueling of LPG cylinders in big quantity. Filling scale and evacuation unit mounted in container. Available container size – 10/20/40 feet.

Consist of:

- Filling scale (max 5 pcs)
- Evacuation unit with hand operated pump
- Hand operated lek testing unit (option)
- Hand operated shrinking machine (option)
- Internal pipe system for easy and safe operation
- E-control box

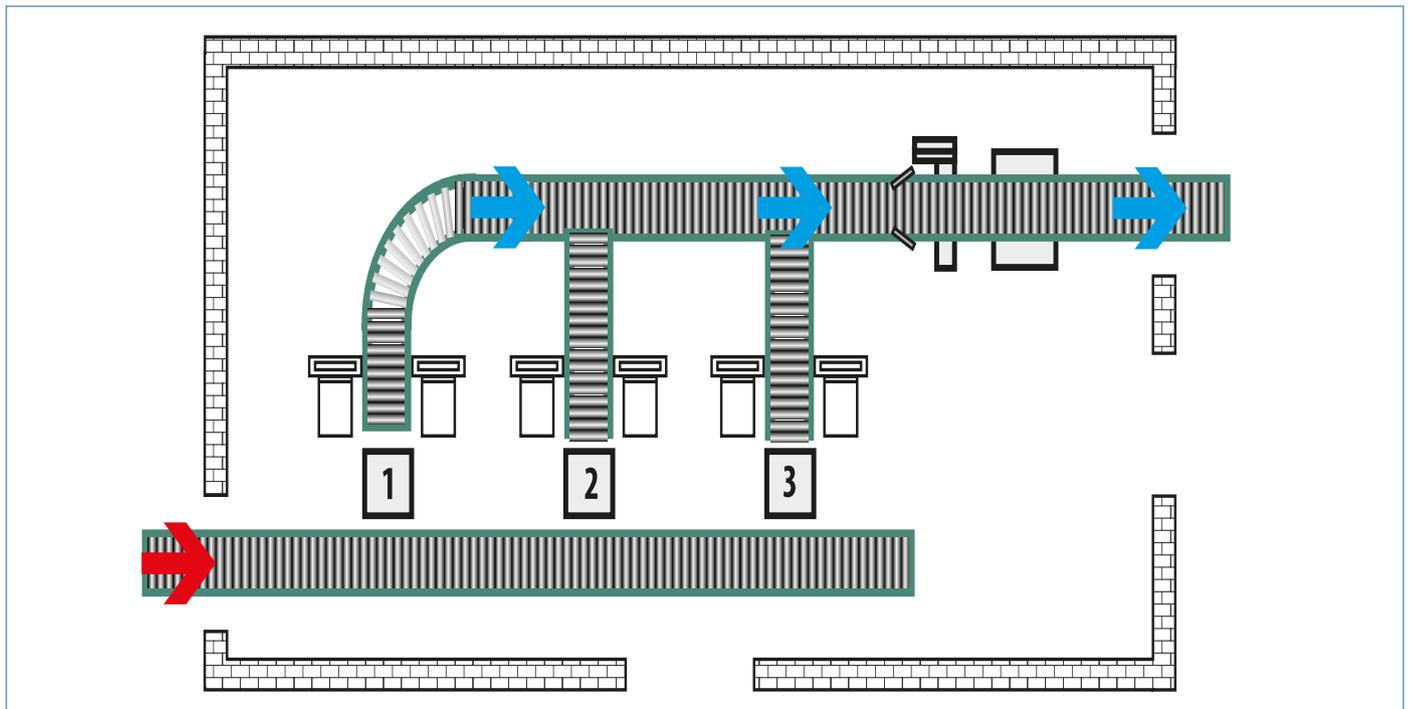

Complete LPG cylinder refueling station in “NON DRIVEN ROLL CONVEYOUR” version

- Max number of filling scales – 6 pcs.
- Max capacity of station – up to 150-170 cylinders* per hour
- Conveyor configuration – according specification. customized.
- Specials: easy transportation of LPG cylinder by small investment.

Consist of:

- Filling scale (max 6 pcs)
- Evacuation unit
- Weight check unit
- Hand operated lek testing unit (option)
- Hand operated shrinking machine (option)
- Non driven roller conveyor
- E-control box

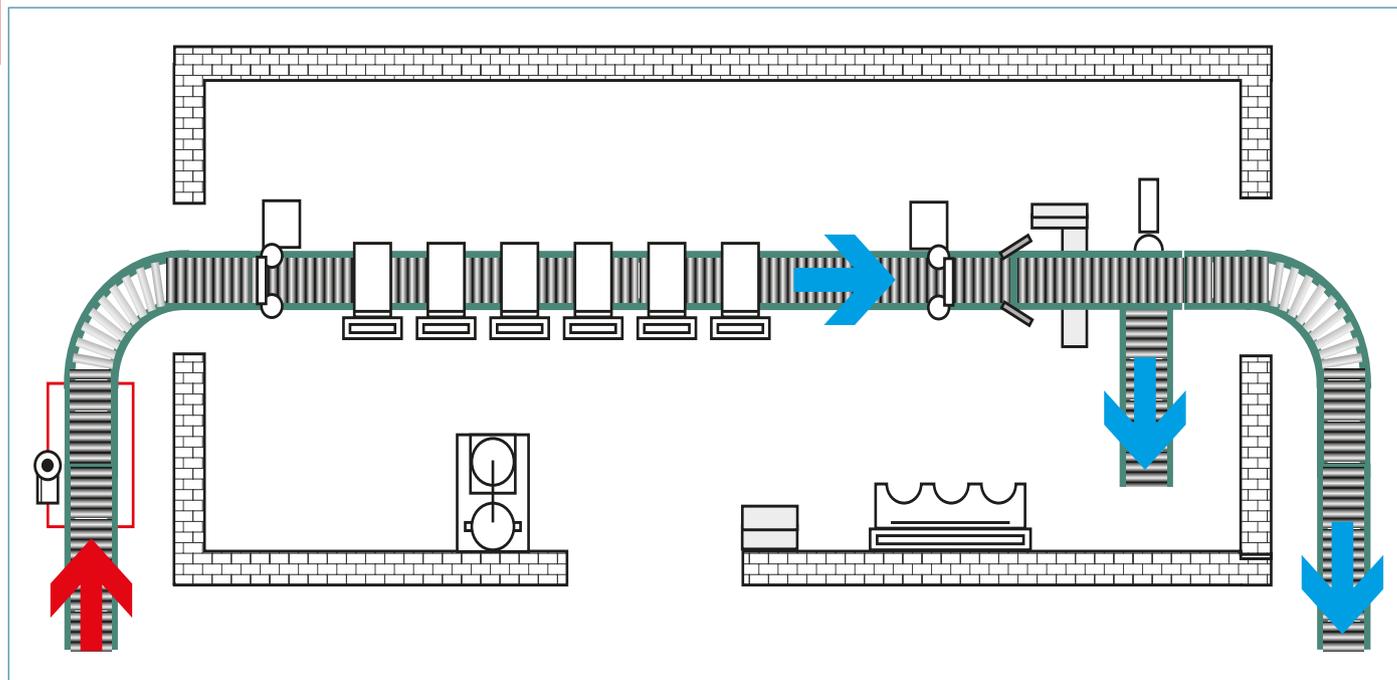

Complete LPG cylinder refueling station in "IN LINE DRIVEN CONVEYOUR" version

- Max number of filling scales: 6 pcs.
- Max capacity of station: 250 cylinders* per hour
- Conveyor configuration: according specification, customized.
- Specials: easy transportation of LPG cylinder by small investment.

Consist of:

- Filling scale (max 6 pcs)
- Evacuation unit
- Weight Check unit
- Hand operated lek testing unit (option)
- Hand operated shrinking machine (option)
- Non driven roller conveyor
- E- control box
- Other requested equipment

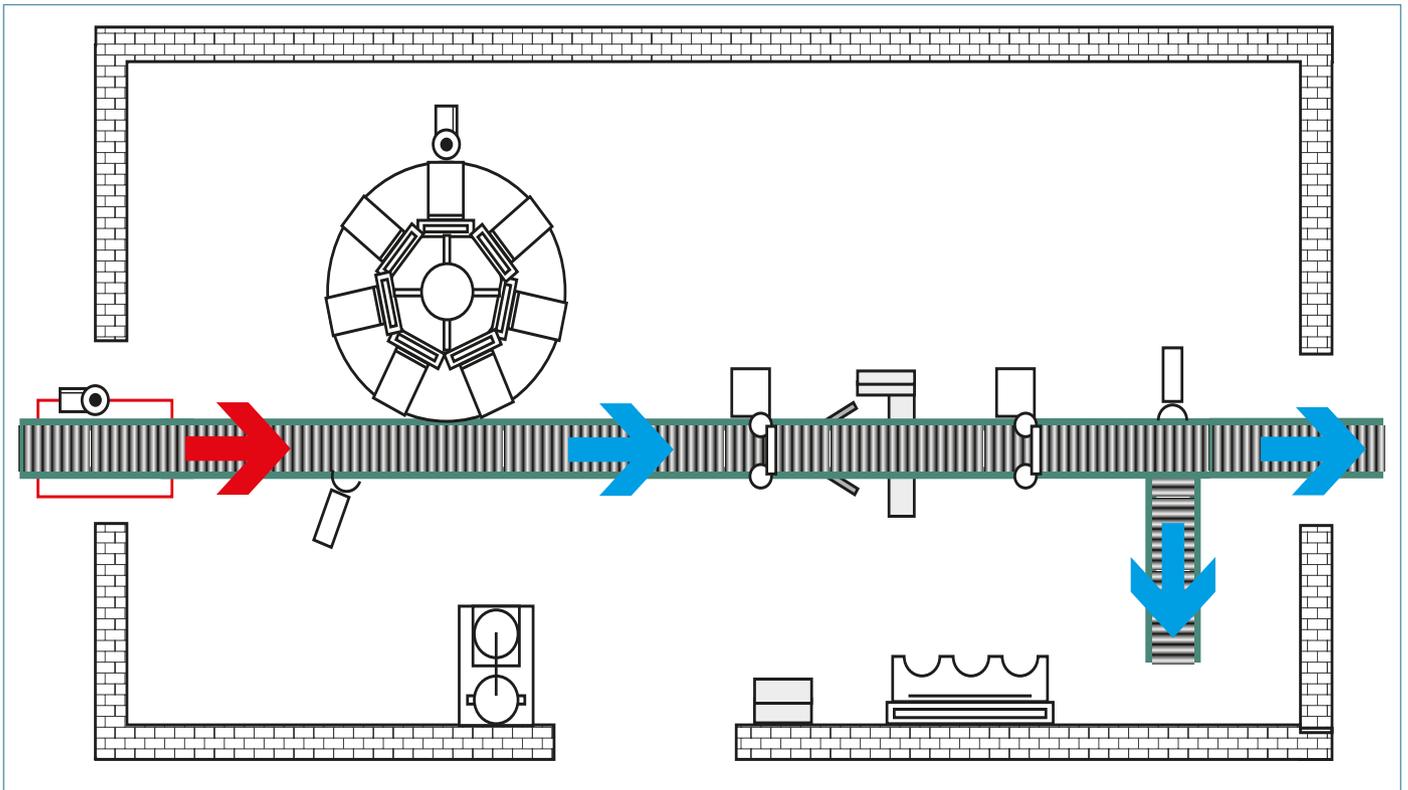

Complete LPG cylinder refueling station in “CAROUSEL DRIVEN CONVEYOUR” version

- Max number of filling scales: 36 pcs.
- Max capacity of station: 1 500 cylinders* per hour
- Conveyor configuration: according specification. customized.
- Specials: high capacity automatically refuellung of LPG cylinder

Consist of:

- Filling scale (max 36 pcs)
- Evacuation unit
- Automatically operated weight Check unit
- Automatically operated lek testing unit (option)
- Automatically operated shrinking machine (option)
- Non driven roller conveyer
- E-control box
- Other requested equipment

Industrial compressors

Corken compressors for industrial applications

- type of compressors – piston
- type of cooling – air
- type of lubrication – oil free
- type of compression – single stage, two staged
- purging system (optional)
- working pressure – up to 112 bar
- capacity – up to 50000 m³/h (depending on process)

Applications:

- transport of liquid gases
- recuperations of gases
- oil, natural gases production
- CNG applications
- loading and unloading of liquid gases
- chemical and petrochemical processes

Common mediums			
Ammonia	Cyclopropane	Hydrogen	Cyclohexan
Argon	Deuterium	Hydrogen Chloride	Hydrocarbon gas
Benzene	Dimethylamine	Isobutane	Monomethylamine
Biogas	Dimethyl ether	Isobutene	Natural gas
Butadiene	2,2-dimethylpropane	Isobutylene	Neon
Bromotrifluoromethane	Ethane	Krypton	Nitric oxide
Carbon dioxide	Ethyl chloride	Methane	Nitrous oxide
Carbon monoxide	Ethylene	Methyl acetylene	N-octaine
Carbon tetrachloride	Ethylene oxide	Methyl bromide	Ozone
Carbonyl sulfide	Helium	Methyl chloride	N-pentane
Chlorine	Hexafluoroethane	Methyl fluoride	Phosgene
Chlorodifluoro-Methane	N-heptane	Methyl mercaptane	Propane
Cyanogen	N-hexane	Monoethylamine	Propylene
Refrigerants			
CFC-11	CFC-503	Sulfur dioxide	Vinyl bromide
CFC-12	NCFC-22	Sulfur hexafluoride	Vinyl fluoride
CFC-13	NCFC-141B	Tetrafluoroethylene	Vinyl chloride
CFC-113	NCFC-134A	Trichlorethane	Xenon
CFC-502	NCFC-152A	Trimethylamine

Dry running piston compressor unit for ammonia (NH₃)

- technical process for a chemical facility
- combined 1- and 2-staged execution
- automated change over in 2-staged execution
- application of control equipment with AUMA-drives
- heat exchanger as an intercooler
- complete pipe system, liquid trap, pulsation damper
- instrumentation and monitoring of operation process
- suitable for location outside and inside, installation in Ex-Zone II

Technical data

Inlet pressure min.	0,5 bar
Inlet pressure max.	21 bar
Cubic capacity	1-staged operation – 302,8 m ³ /h
	2-staged operation – 179,4 m ³ /h
Motor capacity	58 kW
Weight	2650 kg

**Dry running piston compressor unit for propylene**

- rail tanker unloading station
- medium: Propylene
- 1-stage design
- complete pipe line system
- liquid trap
- instrumentation and monitoring of operation process
- suitable for location outside and inside
- suitable for installation in Ex-Zone II

Technical data

Inlet pressure min.	0,5 bar
Inlet pressure max.	19 bar
Cubic capacity	393 Nm ³ /h
Motor capacity	58 kW
Weight	2289 kg

Dry running piston compressor unit for Hexane

- technical process for a chemical facility
- 2-staged execution
- heat exchanger as an intercooler
- controlling of frequency converters
- complete pipe system
- instrumentation and monitoring of operation process
- suitable for location outside and inside, installation in Ex-Zone II

Technical data

Inlet pressure min.	0,5 bar
Inlet pressure max.	25 bar
Cubic capacity	13 Nm ³ /h
Motor capacity	5,5 kW
Weight	460 kg

Dry running piston compressor unit for Nitrogen (N₂)

- technical process for fertilizer facility
- 2 compressors, 2 process lines
- surge drum acc. To ASME with isolation
- 2-staged compressor FD351
- heat exchanger as an intercooler
- complete pipe system acc. To ASME 31.3
- medium contacting parts from stainless steel
- instrumentation and monitoring of operation process
- fittings from ASME
- instrumentation with UL/FM
- suitable for location inside
- suitable for installation in Ex-Zone II

Technical data

Inlet pressure min.	5 bar
Inlet pressure max.	58 bar
Cubic capacity	1-staged – 9,6 Nm ³ /h / 2-staged – 3,9 Nm ³ /h
Motor capacity	2×7,4 kW
Weight	3476 kg

B

Industrial pumps

**Universal single-stage circulation pump
in a compact block version BLOC NUB/NUBF**

High power efficiency

- low flow rate
- slight speed-high difference

Technical advantages

- thrust free open or balanced closed impellers
- compensation of radial force through control equipment in ring housing

Process reliability

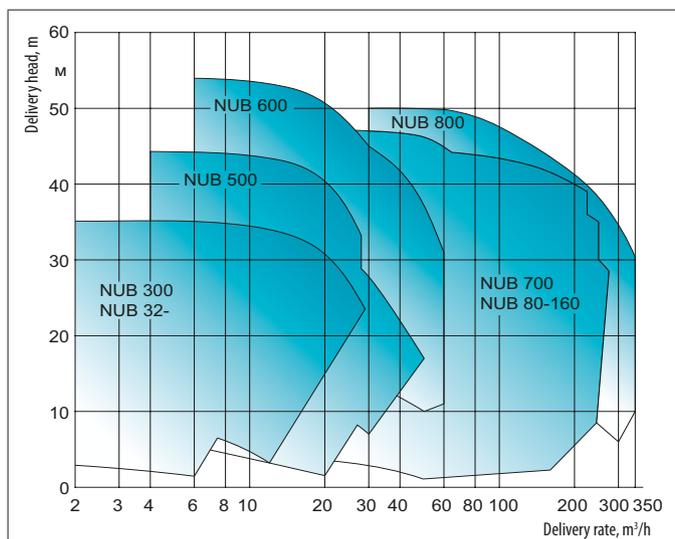

- partial gas transfer
- wide characteristic curves
- selection between flat or abrupt characteristic curves
- top control mode

Easy installation

- large flange nominal sizes
- no pipe extension required
- any installation position
- compact pump design

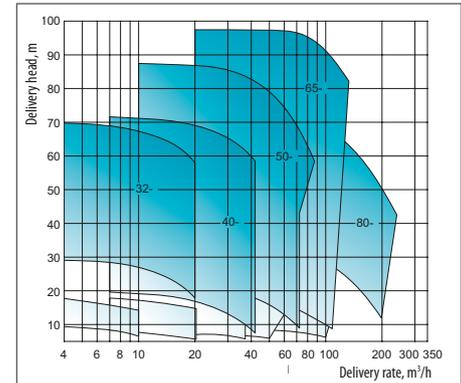

Easy service and operation conditions

- operating pressure up to 10 bar
- temperature -40°C up to $+140^{\circ}\text{C}$
- viscosity up to $115 \text{ mm}^2/\text{s}$

Universal single-stage centrifugal pump BLOC CB BC in stainless steel

- closed impellers
- single or double mechanical seal
- easy service thanks to pull-back version
- material stainless steel/stainless steel sheet
- operating pressure up to 10 bar
- temperature -25 up to +110°C
- viscosity up to 115 mm²/s

Universal single-stage circulation pump in inline-version LUB

Technical advantages

- thrust free open or balanced closed impellers
- compensation of radial force through control equipment in ring housing

Process reliability

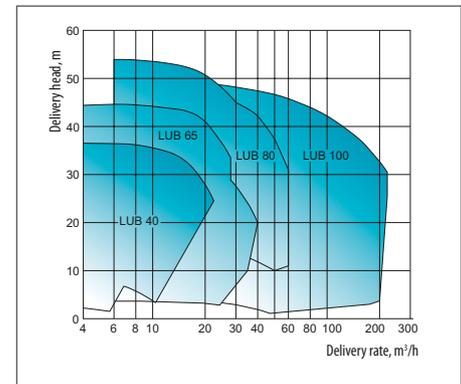

- capability of transfer of gas in the liquid
- wide characteristic curves
- selection between flat or abrupt characteristic curves
- top control mode

Easy installation and service

- pull-back version
- extracting coupling

Application

- operating pressure up to 10 bar
- temperature -40°C up to +140°C
- viscosity up to 115 mm²/s

Unchokable pump in a compact block version FUB CBF

Process reliability

- solid transfer
- cavitation adaptability
- mild medium transfer
- non-sensitive for pigtail- and clew formation

Technical advantages

- pulse transmission by recessed vortex type impeller
- free ball pass up to 80 mm diameter
- abrasion cover and other special designs

Easy installation

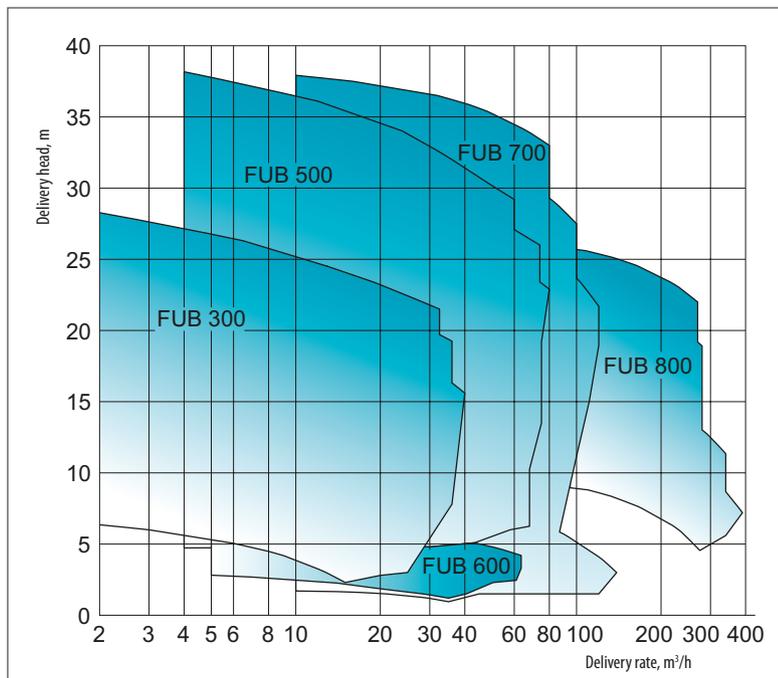

- any installation position
- compact pump design

Easy service

- pull-back version
- robust construction

Application

- operating pressure up to 10 bar
- temperature -40°C up to $+140^{\circ}\text{C}$
- viscosity up to $60\text{ mm}^2/\text{s}$
- solids content

Multi-stage circulation pump LBU VBU NHP Z

High power efficiency

- integrated jet pump or mixture formation
- low flow rate
- optimized impeller inflow
- small internal friction losses
- optimized stage's delivery head

Technical advantages

- thrust free open or balanced closed impellers
- compensation of radial force through control equipment in ring housing
- NPSH-pre-stages

Process reliability

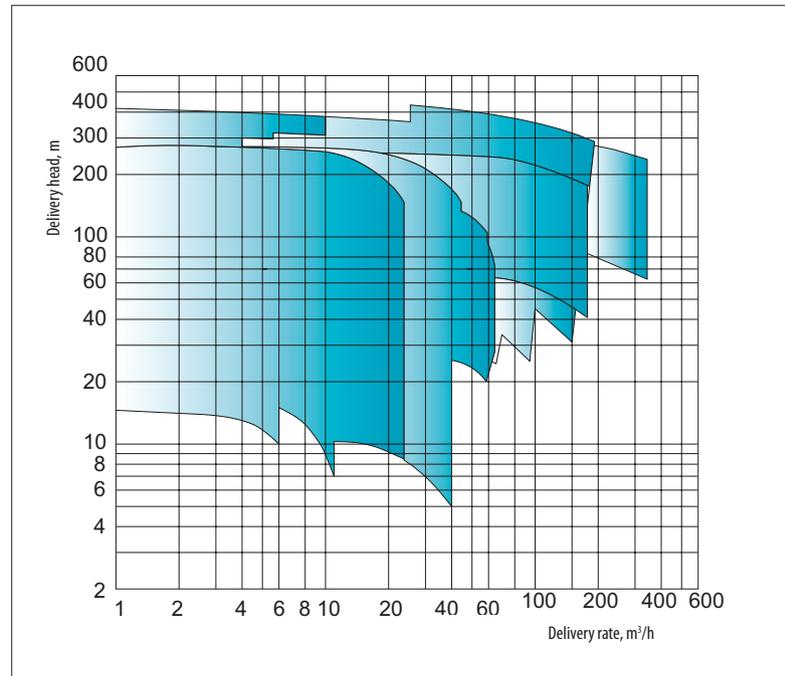

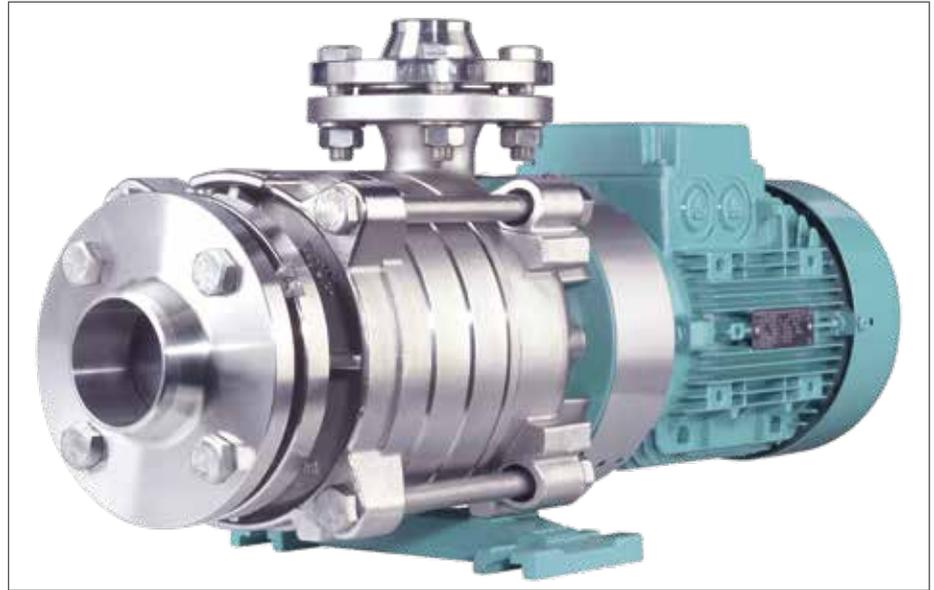

- capability of transfer of gas in the liquid
- wide characteristic curves
- selection between flat or abrupt characteristic curves
- top control mode

Easy installation

- modular system for individual solutions
- free selection of nipple position
- horizontal or vertical execution
- block- or ground plate design

Application

- operating pressure up to 64 bar
- temperature -60°C up to +220°C
- viscosity up to 115 mm²/s

Self-sucking centrifugal pump E SUB S

High power efficiency

- integrated jet pump or mixture formation
- low flow rate
- optimized impeller inflow
- small internal friction losses
- optimized stage's delivery head

Technical advantages

- thrust free open or balanced closed impellers
- compensation of radial force through control equipment in ring housing

Process reliability

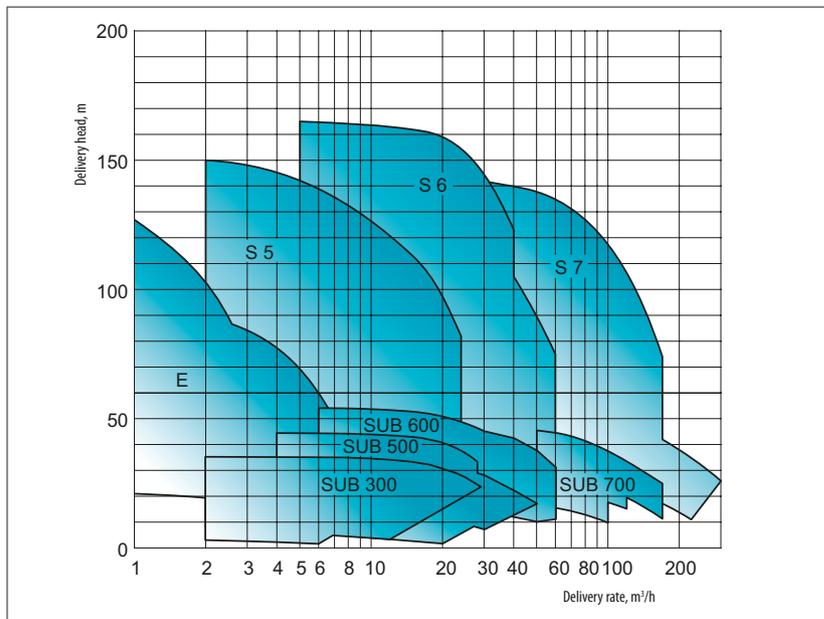

- self-sucking
- capability of transfer of gas in the liquid
- wide characteristic curves
- selection between flat or abrupt characteristic curves

Easy installation

- modular system for individual solutions
- horizontal execution
- block- or ground plate design

Application

- operating pressure up to 16 bar
- temperature -40°C up to $+90^{\circ}\text{C}$
- viscosity up to $115\text{ mm}^2/\text{s}$

Multiphase centrifugal pump type PBU EB LBU

High power efficiency

- optimal enrichment and mixing of fluids with gases
- high degree of dispersion
- low flow rate
- optimized impeller inflow
- small internal friction losses
- optimized stage's delivery head

Technical advantages

- thrust free open impellers
- compensation of radial force through control equipment in ring housing
- direct gas addition acc. to VDMA 24430

Process reliability

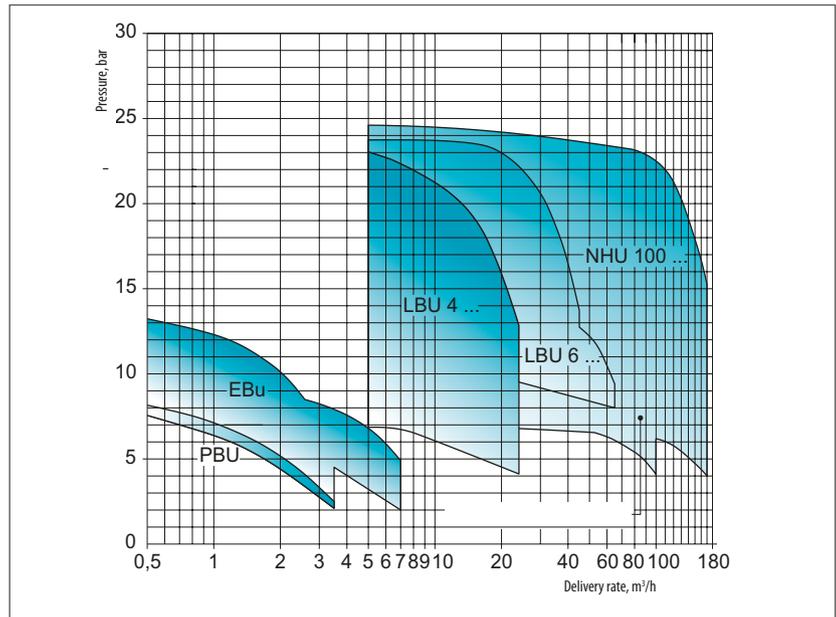

- ability of gas transfer up to 30%
- stable producing of micro bubbles

Easy installation

- modular system for individual solutions
- horizontal execution
- block- or ground plate design

Application

- operating pressure up to 40 bar
- temperature -40°C up to $+140^{\circ}\text{C}$
- viscosity up to $115\text{ mm}^2/\text{s}$

Universal space saving submersible pump B CTOL

High power efficiency

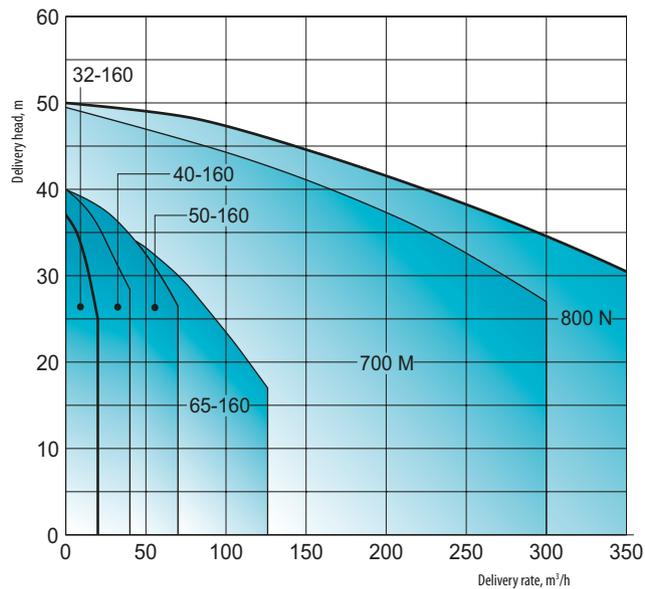

- no shaft seal
- no external leakage
- with vortex type impeller

Easy installation

- space saving design
- modular system for individual solutions

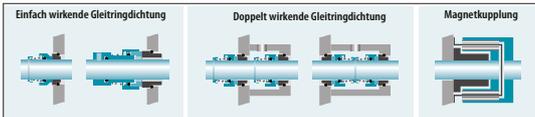

Applications

- operating pressure up to 10 bar
- temperature -25 up to +90°C
- viscosity up to 115 mm²/s
- special pump models for other conditions

Pump unit for transfer of light fuel oil products (petrol, kerosene, diesel and fuel oil)

- constant high efficiency
- ability to increase the productivity and differential pressure
- mechanical seal
- available with double mechanical seal "Tandem" or magnetic coupling
- compact version

D

Road tanker equipment

FAS 32 0451 Corken pump
for liquid CO₂, Type CDBN 1022

- inlet /outlet – 3" NPT
- flow rate (max) – 1514 l/min (by low viscosity medium)
- maximum differential pressure – 8,6 bar
- high pressure design with O-ring construction
- mechanically sealed with a silicon carbide seal seat
- six vanes and vane drivers
- adjustable internal relief valve
- replaceable cam, liner, and reversible slide plates
- ideal for liquids with high vapor pressures

**Pumps Corken PZ**

for petroleum products and industrial solvents, for installation on a road tanker

**FAS 21 3181 FAS-Corken pump aggregate for liquid CO₂**

Type CDBN 1022, capacity approx. – 530 l/min at 2 bar differential pressure; 450 l/min. at 8,6 bar differential pressure. Consists of:

- pump CDBN 1022, connection – 3" NPT, with special mechanical seal,
- gear-motor 7,5 kW (560 rpm, IP 54, 400/690 V)
- with coupling and coupling protection
- mounted on a common base plate

FAS-Corken pump aggregate for liquid CO₂

Type CDBN 1022, capacity approx. – 530 l/min at 2 bar differential pressure; 450 l/min. at 8,6 bar differential pressure.

Execution:

- **FAS 21 3183** – without ground plate
- **FAS 21 3182** – standart

FAS-Corken pump aggregate consists of:

- pump CDBN 1022, connection – 3" NPT, with special mechanical seal,
- gear-motor 15,0 kW (560 rpm, IP 54, 400/690 V)
- with coupling and coupling protection
- mounted on a common base plate

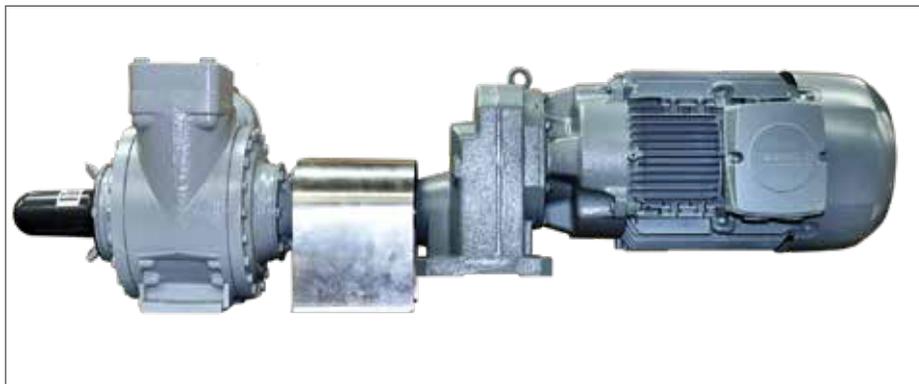

Order No.	Type	Connection, " NPT	Max. capacity, l/min	Max. operation pressure, bar	Max. differential pressure, bar	Max. operation temperature, C°
21 2966	PZ 7	2	400	13,8	8,6	149
21 2969	PZ 10	2½	610	13,8	8,6	149

FAS 21 284 Blackmer-pump for liquid CO₂

Type CRL3

- inlet/outlet – 3" NPT,
- maximum flow rate – 560 l/min (by low viscosity medium)
- maximum differential pressure – 8,6 bar
- double wave version

FAS 21 288 FAS-Blackmer pump aggregate for liquid CO₂

Type CRL3. Capacity approx. – 400 l/min at 3 bar differential pressure, 320 l/min at 6.5 bar differential pressure. Pump aggregate consisting of:

- pump CRL3, connection – 3" NPT, with special mechanical seal
- with gear-motor 7,5 kW, 570 rpm, IP 54, 400/690 V
- with coupling and coupling protection
- mounted on a common base plate

FAS 21 285 Blackmer-pump for liquid CO₂

Type CRL4

- inlet/outlet – 4" NPT,
- maximum flow rate – 950 l/min (by low viscosity medium)
- maximum differential pressure – 8,6 bar
- right hand rotation

FAS 21 2882 FAS-Blackmer pump aggregate for liquid CO₂

Type CRL3. Capacity approx. – 400 l/min at 3 bar differential pressure, 320 l/min at 6.5 bar differential pressure. Execution – without ground plate. Pump aggregate consisting of:

- pump CRL3, connection – 3" NPT, with special mechanical seal
- with gear-motor 7,5 kW, 570 rpm, IP 54, 400/690 V
- with coupling and coupling protection
- without common base plate

Centrifugal pump unit for CO₂ liquid phase

- type – NZ 36-7,4-15 STW
- normal suction
- horizontal
- bloc design
- with electromotor
- material – stainless steel V4A

Order No.	Motor, kW	Capacity, l/min	By dif. pressure, bar	P _{max} , bar
46 0963	15	600	6,6 (1,03 dm ³ /cm ³) 7,5 (1,116 dm ³ /cm ³)	40
46 0967	Bare pump	750 max	–	40

A

Refueling stations LNG, L-CNG

Through many years of experience in the liquid gas market FAS has already been involved several times in the construction of gas refueling. With our wide range of various filling station executions, we can find the right solution for every application. The rapid development of natural gas applications (NG) has moved us to extend our know-how for LNG and L-CNG filling stations.

ALTERNATIVE FUEL

LNG filling station – Version 1: LNG

LNG filling stations FAS are designed for filling of all types of trucks with liquefied natural gas. Typical filling station consists of the following components:

- LNG tank
- pump unit of low pressure
- saturation vaporizer
- LNG dispenser
- electrical control box

The module design allows in the shortest possible time to adapt the performance of the station to almost any consumer needs.

LNG filling station – Version 2: a combination of LNG-L-CNG

Combined filling stations FAS are designed for filling of all cars with liquefied natural gas and liquefied compressed natural gas. Typical filling station consists of following components:

- LNG tank
- pump unit of low pressure (LNG line)
- saturation vaporizer (LNG line)
- LNG dispenser (LNG line)
- pump unit of high pressure (L-CNG line)
- high pressure vaporizer (L-CNG line)
- block-battery (LNG line)
- LNG dispenser (LNG line)
- electrical control box

The module design allows in the shortest possible time to adapt the performance of the station to almost any consumer needs.

LNG filling station – Version 3: modular LNG filling station in container execution

LNG filling station in container execution is designed to carry out the following processes:

- receipt and storage of LNG
- increase of LNG pressure up to 5-8 bar
- filling of LNG trucks

The station is a factory product ready for connection and includes all the main components for safe reception, storage and refueling with automatic control of all production processes.

Container design suppose a limitation of the volume of capacity to 20 cubic meters. If necessary, to increase the storage volume – it is possible to carry out the tank outside the container.

B

Regasification unit

Regasification stations consist of the following main technological units

Tank	Vaporizer	Vaporizer	Heating	Regulator	Metering unit	Odorizer	Automation
Unit 1	Unit 2	Unit 3	Unit 4	Unit 5	Unit 6	Unit 7	Unit 8

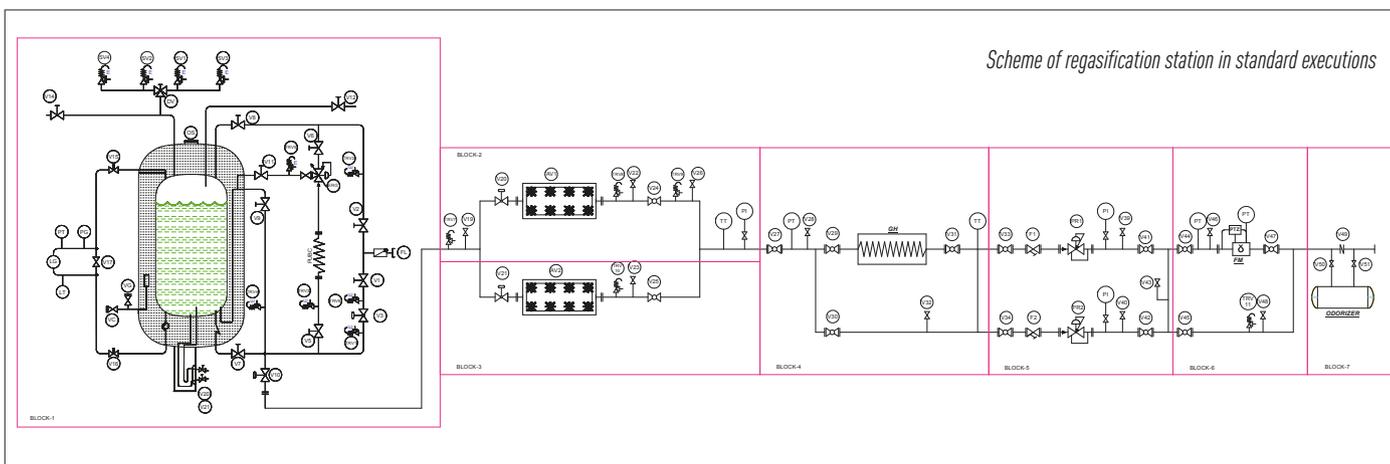

Regasification stations in their standard executions

The LNG regasification station is designed to convert the liquid phase into vapor, followed by lowering the pressure incl. odorizing option for further supply to various groups of natural gas consumers.

The most demanded standard sizes of LNG / LNG regasification stations are

Consumption LNG, kg/h	Capacity, kW/h	Capacity of vaporizer, Nm ³ /h	Area of vaporizer, m ²
100	1 200	150	64
170	2 000	300	121
330	4 000	450	178
500	6 000	750	300
650	8 500	900	355
750	9 500	1 050	390
1 000	12 500	1 500	586
2 000	25 000	2×1500	2×586

Installations of higher capacity are possible. The volume and number of containers depends on required capacity and delivery frequency.

Scheme of regasification station in standard executions

Regasification stations in container design consist of following units:

Tank	Vaporizer	Vaporizer	Heating	Regulator	Metering unit	Odorizer	Automation
Unit 1	Unit 2	Unit 3	Unit 4	Unit 5	Unit 6	Unit 7	Unit 8

Regasification stations in container design

The LNG regasification station is designed to convert the liquid phase into vapor, followed by lowering the pressure incl. odorizing option for further supply to various groups of natural gas consumers.

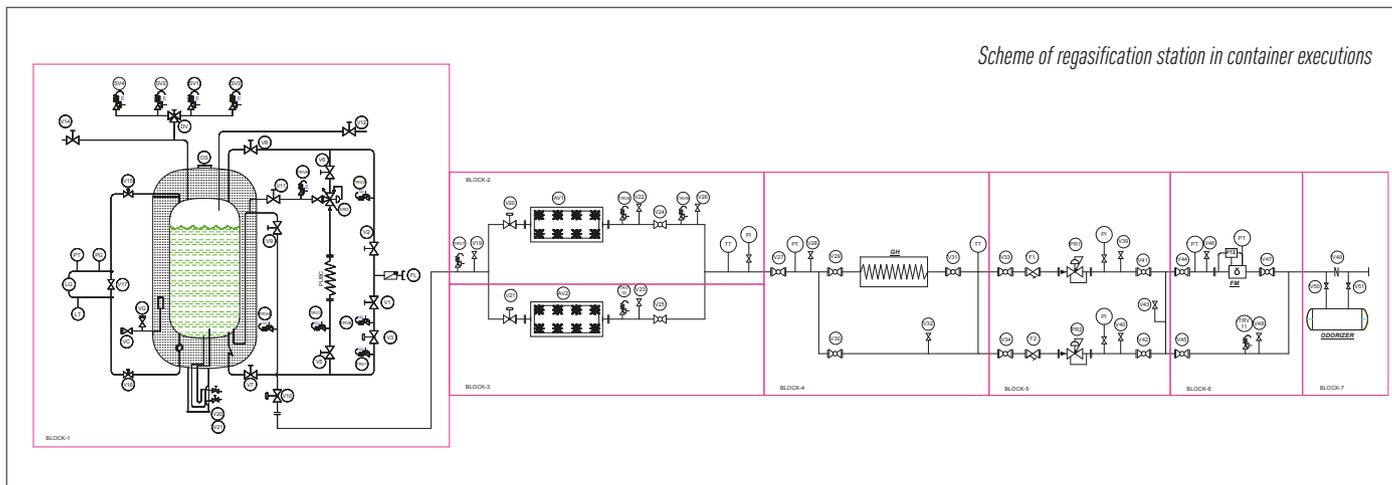

The most demanded standard sizes of LNG / LNG regasification stations are

Dimensions of tank frame	Capacity	Capacity of vaporizer, Nm ³ /h	Area of vaporizer, m ²
10 ft	1 500	150	66
20 ft	4 000	450	178
30 ft	7 000	800	289
40 ft	10 000	1 150	445

As a tank or logistics fleet can be used the following tank containers:

- 20 ft
- 30 ft
- 40 ft

Scheme of regasification station in container executions

DME Dispensers and refuelling

DME refuelling – complete plants for public and internal applications

DME fuel dispenser type FAS in design according to customer specifications, complete with an above-ground storage up to 4,850 l and all necessary fittings/equipment, mounted on a galvanised base frame, piped, wired, primed and painted.

Documentation:

- with declaration of conformity and CE-marking (CE 2266) according to PED 2014/68/EU, rating according to category IV module H1

Structural and operational features:

- *overflow protection, type CL or comparable. Optionally with or without level measurment;*
- *filling line for the tank is equiped with ball valve, solenoid valve, non-return valvel (2 pcs.);*
- *solenoid valve explosion proof DN 25 PN 40, 230 V, 50 Hz;*
- *Ebsray pump unit type RC 25 for DME, PN 25 (flow rate: max. 90 l/min at 2990 rpm, 3-phase);*
- *motor 2,5 kW, EEx e II T3, 400/690V, 50 Hz);*
- *relief valve type RV18-CBS10 (vapour removal system), 1“ NPT-*

DME Fuel dispensers type FAS

with full hose system were specially developed for dispensing of DME. The advantages include modern design, low maintenance costs, long service life, high performance, reliability and safety with a good price-performance ratio. DME dispensers from FAS are available in various designs for public and internal use.

Electrical equipment:

- *Electronic price calculator;*
- *LCD-Display*

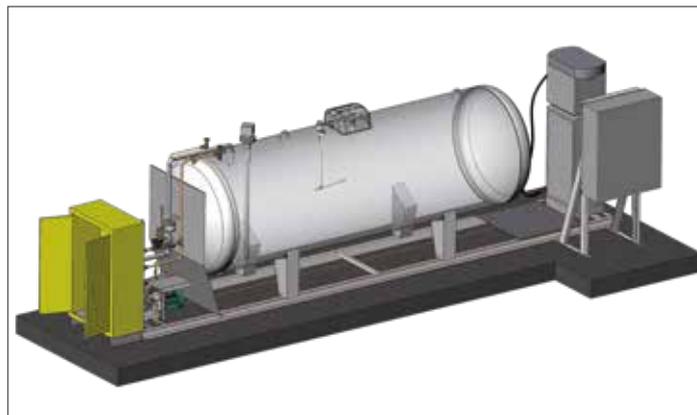

Protocol according to customer specifications. Power supply – 230 V AC/50-60 Hz.

Hydraulic equipment:

- *PN 25 design;*
- *Special Coriolis meter for DME;*
- *Gas bubble separator;*

- *Pressure retaining valve;*
- *Hydraulic accumulator;*
- *Pipe-break valve upstream of DME hose;*
- *DME high pressure hose;*
- *Pressure line connection 1“NPT IG;*
- *Vapour recovery line connection ¾“NPT IG.*

DME dispensers for public use are MID compliant.

- *IG, with recirculation into the gas phase of the tank;*
- *dry-running protection by means of electrical power measurement;*
- *with break away coupling in the pressure line of the delivery device;*
- *including galvanised fire protection plate for isolation of the tank connection fittings.*

Dispensers types:

- FAS-120: 1 meter, 1 high pressure hose, 1 display
- FAS-220: 1 meter, 1 high pressure hose, 1 display, housing „High Mast“
- FAS-230: 2 meter, 2 high pressure hoses, 2 displays, housing „High Mast“
- FAS-430: in-plant use, 1 meter, 1 high pressure hose, 1 display.

Options: Foundation frame, galvanised, for screwing on or setting in concrete; Foundation frame, galvanised, to accommodate breakaway couplings; Solenoid valve in the pressure line; Hose retraction system.

LNG-Tanks

LNG tanks

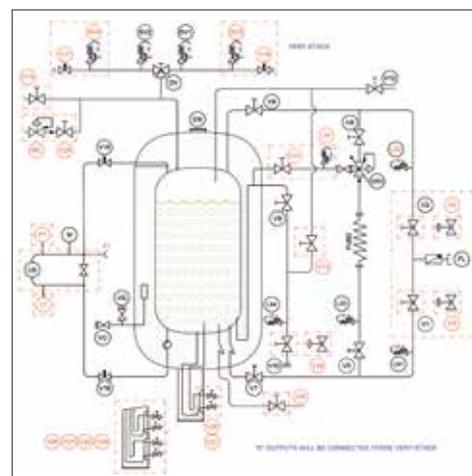

LNG tanks are available both in a vertical and in a horizontal execution. Tank design depends on the purpose and intended use:

- as a part of a filling station
- as a part of the regasification station

The time of non-drainage storage is determined by the maximum working pressure and type of insulation.

V, liter	Dif.	Net V, liter	Working pressure, bar	Hight, mm	Diameter, mm	Length, MM	Weight, kg (5 bar)	Weight, kg (12 bar)
5 800	5%	5 500	5-12	2 300	2 300	4 200	2 400	2 700
8 000		7 700				5 200	2 800	3 200
10 300		9 800				6 200	3 200	3 600
15 900		15 100				8 200	4 200	4 900
20 400		19 500				10 700	5 000	5 900

Tanks with volume up to 200 m³ available on request

Hydraulic scheme
of LNG tank

Road tanker equipment

Cryogenic centrifugal pump applications:

- road trailers unloading, storage/iso-containers loading/ unloading
- process and back-up operations, petrochemical industry applications
- special applications with differential head and flow-rates upon customer demand

Cryogenic centrifugal pump unit SGM 185 for LNG

FAS No. – 96 624, maximum capacity – 550 l/min (by maximum differential pressure 6 bar), electric motor – 11 kW (50 Hz 400 V, ATEX Ex-D IIB T4) with junction box and gearbox transmission. Type of shaft-seal – rulon mechanical seal. Inducer to minimize required NPSH

Technical features

- low noise emission (< 80 dB)
- maximum allowable working pressure (MAWP) – 23/33 bar*
- max head (50 Hz) – 420 m
- max suction pressure required – 6 bar
- inlet – DN 65, outlet – DN 40

Components:

- FAS 96 6245 – PT100 temperature probe for leakage detection
- FAS 96 6246 – PT100 temperature probe – for cool-down of pump

- FAS 96 6247 – PT100 temperature probe – for over temperature detection
- FAS 96 6240 – conical filter DN 65, assembled on the pump
- FAS 96 6241 – suction flange DN 65 PN 40, assembled on the pump
- FAS 96 6242 – discharge counter flange DN 40 PN 40 with hole $G\frac{1}{8}$ " x PT 100, assembled on the pump
- FAS 96 6243 – flexible pipe 2 1/2" DN 65 PN 25, L=300 mm (suction line), assembled on the pump
- FAS 96 6244 – flexible pipe 1 1/2" DN 40 PN 40, L=300 mm (discharge line), assembled on the pump

Cryogenic centrifugal pump unit DSM 230 for LNG

FAS No. – 96 626, capacity – 1000 l/min (by max differential pressure 3 bar), motor 11 kW (50 Hz 400 V, ATEX Ex-D IIB T4), with junction box and Direct Coupling transmission. Type of shaft-seal – rulon mechanical seal. Inducer to minimize required NPSH.

Technical features

- low noise emission (< 80 dB)
- transmission – Direct Coupling
- max suction pressure required – 6 bar
- inlet – DN 100, outlet – DN 80

Components:

- FAS 96 6261 – conical filter DN 100, assembled on the pump
- FAS 96 6262 – flange ASME B16.5 type SO-RF 4" -300 LB A304, assembled on the pump
- FAS 96 6263 – flange ASME B16.5 type SO-RF 3" -300 LB A30, assembled on the pump

- FAS 96 6264 – flexible pipe 4" DN 100 PN 25, L=300 mm, assembled on the pump
- FAS 96 6265 – flexible pipe 3" DN 80 PN 25, L=275 mm, assembled on the pump
- FAS 96 6266 – PT 100 temperature probe for leakage detection
- FAS 96 6267 – PT temperature probe for cool-down of pump

Coriolis flow meters for LNG mobile (road tanker) and stationary (loading of refueling and regasification stations) applications

FAS 98 8684 LNG coriolis mass flow meter Type F500 8F5B50, 2"/DN 50

Maximum flow – 20 000 kg/h (by 2 bar operation pressure), display: mass flow unit – "kg/h", volume flow unit – "l/h", density unit – "kg/l", temperature unit – "°C".

- approval; transmitter; sensor – EAC; Z1/21,Ex de; ZD/1,Z21,IIC/IIIC
- D Power Supply – 24 V (DC)
- MA Output; Input 1 – Modbus RS 485
- A Output; Input 2 – w/o; input 3 – w/o; input 4 – w/o;
- F Display: operation – 4-line illum., touch control

FAS 98 8688 LNG coriolis mass flow meter Type F500 8F5B80, 3"/DN 80

Maximum flow – 50000 kg/h (by 2 bar operation pressure), display: mass flow unit – "kg/h", volume flow unit – "l/h", density unit – "kg/l", temperature unit – "°C".

- approval; transmitter; sensor – EAC; Z1/21,Ex de; ZD/1,Z21,IIC/IIIC
- D Power Supply – 24 V (DC)
- MA Output; Input 1 – Modbus RS 485
- A Output; Input 2 – w/o; input 3 – w/o; input 4 – w/o;
- F Display: operation – 4-line illum., touch control

Equipment for use with gases in medical, food and other cryogenic applications

Series 2400 – safety valves made of stainless steel, angle-type with threaded connections.

Safety valves are set and sealed at the factory and are oil- and grease-free as standard.

- connections – 1/4-1 1/2"
- temperatures – -200...+200°C
- setting pressure – 0,2...70,0 bar

Series 2480 – safety valves made of gunmetal, angle-type with threaded connections.

Safety valves are set and sealed at the factory and are oil- and grease-free as standard.

- connections – 1/4-1"
- temperatures – -200...+200°C
- setting pressure – 0,2...70,0 bar

Series 2700 – diverter ball valves made of stainless steel with threaded connections.

For use with gases in medical, food and other cryogenic applications. The ball-valves of this type are oil- and grease-free as standard.

- connections – 3/4-1 1/4"
- temperatures – -200...+200°C
- setting pressure – PN 63

Series 2580 – overflow valves made of gunmetal, angle-type with threaded connections.

For use with gases in medical, food and other cryogenic applications. Overflow valves of this type are oil- and grease-free as standard.

- connections – 1/4-1/2"
- temperatures – -200...+200°C
- setting pressure – 0,2...70,0 bar

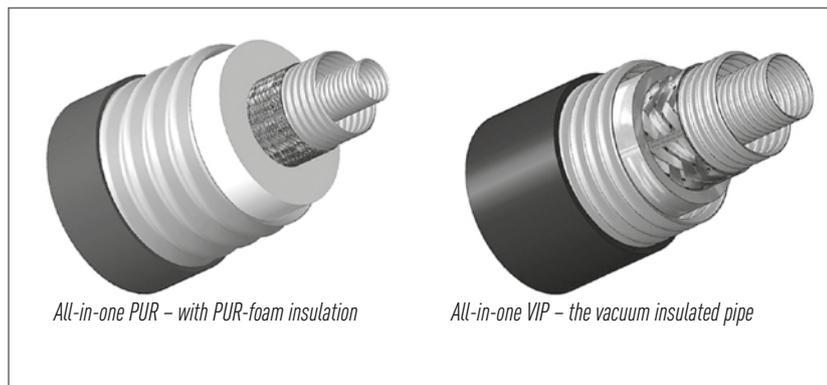

Series 2780 – diverter ball valves made of gunmetal with threaded connections.

For use with gases in medical, food and other cryogenic applications. The ball-valves of this type are oil- and grease-free as standard.

- connections – 3/4-1 1/4"
- temperatures – -200...+200°C
- setting pressure – PN 63

LNG pipe – vacuum or PUR insulated

All-in-one PUR – with PUR-foam insulation

All-in-one VIP – the vacuum insulated pipe

The LNG all-in-one pipe consists out of three endless corrugates pipes:

- LNG-supply
- LNG/BOG-return
- the third one also is a corrugated pipe which creates a secondary containment for the LNG and contains the
 - optimized PUR-foam insulation or
 - vacuum superinsulation

FAS 61 6508 CryoMac® 3 50 GPM LNG Filling Nozzle

- flow capacity – 50 GPM
- JIC male SAE 37° flare fitting for 1" tube – stand
- handle ISO 12617 road vehicles certified
- EX II 2 G c IIA T3

Certified according to ISO 12617 approved product as specified by ISO 16924
Natural gas fueling stations – LNG stations for fueling vehicles

Equipment for cryogenic applications

Globe valve HEROSE Type 01 641 for cryogenic applications

Type – 01641 stainless steel, size – 1/2- 6" (DN 10- DN 150), pressure range – Cryogenic-Globe and Globe/ Check Valves – PN 50 (DN 150=PN 40), "Fire safe" type test approval acc. to EN ISO 10497

- approved for air gases, vapors and cryogenic liquefied gases incl. LNG
- working temperature: -196...+120°C
- stainless steel body and live loaded gland packing
- cleaned and degreased for oxygen service
- socket weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312
- butt weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312

Actuated globe valve HEROSE Type 01 643 for cryogenic applications

Type – 01 643 stainless steel, size – 1/2-6" (DN 10- DN 150), pressure range: Cryogenic-Globe Valves with pneumatic actuator, PN 50 (DN 150=PN 40), "Fire safe" type test approval acc. to EN ISO 10497

- stainless steel body and top work
- actuator – air opens, spring closes and live loaded gland packing
- cleaned and degreased for oxygen service
- the actuator is not cleaned and degreased for oxygen
- butt weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312
- socket weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312

Type 01 641	Technical Data													
Nominal Size	DN	10	15	15	20	25	32	40	40	50	65	80	100	150

Height, mm		370	370	370	370	375	405	420	420	425	510	575	635	685

Globe valve HEROSE Type 01641 for cryogenic applications

In flow direction, the valve with the nominal size DN 200 is conform to tightness class L1 up to 9 bar maximum differential pressure acc. to DIN 12567 for LNG use. This standard can also be used for the tightness class of other cryogenic gases.

Type – 01641 stainless steel, size – DN 200, stainless steel body and live loaded gland packing, pressure range and size: Cryogenic Globe Valves, DN 200, PN 25. "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapors and cryogenic liquefied gases incl. LNG.

- working temperature – -196...+120°C
- socket weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312
- butt weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312

Actuated Globe Valve HEROSE Type 01643

In flow direction, the valve with the nominal size DN 200 is conform to tightness class L1 up to 18 bar maximum differential pressure acc. to DIN 12567 for LNG use. This standard can also be used for the tightness class of other cryogenic gases.

Available accessories/options (on request only):

- Solenoid valve • Limit switch • Electropneumatic positioner etc.
- Welded stainless steel stubs acc. to ISO 1127 or ASTM A312
- Actuator "cleaned and degreased for oxygen service" • Valve with check or control disc (tapered design)

Type – 01 643 stainless steel, size – DN 200, stainless steel body and top work. Actuator – air opens, spring closes or contrary "live loaded" gland packing, pressure range: cryogenic-globe valves with pneumatic actuator – PN 25. "Fire safe" type test approval acc. to EN ISO 10497. Applications: approved for air gases, vapors and cryogenic liquefied gases incl. LNG.

- working temperature – -196...+120°C
- socket weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312
- butt weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312

Type 01 643	Technical Data	
Nominal Size	DN 200	
Face-to face dimension, mm	Overall length	560
Height, mm		785

Globe valve HEROSE Type 01 645 for cryogenic applications

Type – 01 645 stainless steel, size – 1/2-2" (DN 10-DN 50), pressure range: cryogenic-globe and globe/check valves – PN 50. "Fire safe" type test approval acc. to EN ISO 10497

- approved for air gases, vapors and cryogenic liquefied gases incl. LNG
- working temperature – -196...+120°C
- stainless steel body and live loaded gland packing
- cleaned and degreased for oxygen service
- female thread connection (G) acc. to ISO 228/1
- female thread connection NPT acc. to ANSI B 1.20.1

Type 01645	Technical Data								
Nominal Size	DN	10	10	15	20	25	40	40	50
Threated Size	inch	1/4	3/8	1/2	3/4	1	1 1/4	1 1/2	2
Face-to face dimension, mm	Overall Length	70	70	85	100	115	130	130	155
Height, mm		270/370							

Globe valve HEROSE Type 01 651 for cryogenic applications

Type – 01 651 stainless steel, size – 1/2-4" (DN 10-DN 100), pressure range: cryogenic-globe and globe/check valves – PN 50. "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapours and cryogenic liquefied gases incl. LNG. Working temperature – -196...+120°C, recommended working temperature – -60...+120°C.

- stainless steel body and top work
- live loaded gland packing
- cleaned and degreased for oxygen service
- butt weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312
- socket weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312

Type 01651		Technical Data											
Nominal Size	DN	10	15	15	20	25	32	40	40	50	65	80	100
Face-to face dimension, mm	Overall Length	70	85	85	100	115	115	130	130	155	205	245	280
Height, mm		140	140	140	140	140	170	175	175	200	260	310	350

Globe valve HEROSE Type 01655 for cryogenic applications

Type – 01655 stainless steel, size – 1/2-5" (DN 10-DN 50), pressure range: cryogenic-globe and globe/check valves – PN 50, "Fire safe" type test approval acc. to EN ISO 10497. Working temperature – -196...+120°C, recommended working temperature – -60...+120°C. Approved for air gases, vapours and cryogenic liquefied gases incl. LNG.

- stainless steel body and top work
- live loaded gland packing
- cleaned and degreased for oxygen service
- female thread connection (G) acc. to ISO 228/1-
- female thread connection NPT acc. to ANSI B 1.20.1

Actuated trailer valve HEROSE Type 01653 for cryogenic applications

Type – 01653 stainless steel, size – 1/2-3" (DN 10-DN 80), pressure range: cryogenic-globe valves with pneumatic actuator – PN 50, "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapors and cryogenic liquefied gases incl. LNG. Stainless steel body and top work. Working temperature – -196...+120°C, ambient temperature actuator – -50...+70°C. Air pressure for operation 6.0 bar g (maximum 10.0 bar g)/push-in connection 8 mm.

- actuator – air opens, spring closes "live loaded" gland packing
- "cleaned and degreased for oxygen service"
- the actuator is not cleaned and degreased for oxygen
- maximum working pressure of the valve depending on nominal size
- butt weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312
- socket weld connection for stainless steel pipes acc. to ISO 1127 or ASTM A312

Type 01653		Technical Data						
Nominal Size	DN	15	25	40	40	50	65	80
Threated Size	inch	1/2	1	1 1/2	1 1/2	2	2 1/2	3
Face-to face dimension, mm	Overall Length	85	115	130	130	155	205	245
Height, mm		395	444	441	441	420	470	500

Available options (on request only):

- female thread connection (R) acc. to ISO 7-Rc
- valve with control disc (tapered design)

Type 01655		Technical Data								
Nominal Size	DN	10	10	15	20	25	40	40	50	
Threated Size	GW	1/4"	3/8"	1/2"	3/4"	1"	1 1/4"	1 1/2"	2"	
Face-to face dimension, mm	Overall Length	70	70	85	100	115	130	130	155	
Height, mm		140	140	140	140	140	175	175	175	

Globe valve HEROSE Type 03641 / DIN Flange for cryogenic applications

Type – 03641 stainless steel, size – DN 15-DN 150, pressure range: cryogenic-globe and globe/check valves – PN 40, "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapors and cryogenic liquefied gases incl. LNG.

- stainless steel body and top work
- "live loaded" gland packing
- "cleaned and degreased for oxygen service"
- working temperature – -196...+120°C
- flanged connection acc. to DIN EN 1092-1 PN 40

Type 03641	Technical Data									
Nominal Size	DN	15	20	25	40	50	65	80	100	150
Face-to face dimension, mm	Overall Length	140	150	160	200	230	290	310	350	550
Height, mm	270/370									

Globe valve HEROSE Type 03641 / ANSI Flange for cryogenic applications

Type – 03641 stainless steel, size – DN 15-DN 150, pressure range: cryogenic-globe and globe/check valves – class 300, "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapours and cryogenic liquefied gases incl. LNG. Working temperature – -196...+120°C.

- stainless steel body and top work
- live loaded gland packing
- cleaned and degreased for oxygen service
- flanged connection acc. to ANSI B16.5 class 300

Available options (on request only):

- extension H up to 900 mm
- valve with control disc (tapered design)

Type 03641 ANSI	Technical Data									
Nominal Size	DN	15	20	25	40	50	65	80	100	150
Face-to face dimension, mm	Overall Length	140	150	160	200	230	290	310	350	597
Height, mm	270/370									

Actuated globe valve HEROSE Type 03643 / ANSI flange class 150 for cryogenic applications

Type – 03643 stainless steel, size – DN 15-DN 150. Cryogenic-globe valves with pneumatic actuator – class 150. "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapors and cryogenic liquefied gases incl. LNG.

- stainless steel body and top work
- actuator – air opens, spring closes or contrary" live loaded " gland packing
- "cleaned and degreased for oxygen service" – the actuator is not cleaned and degreased for oxygen
- working temperature – -196...+120°C
- flanged connection acc. to ANSI B16.5 class 150

For both executions there are Available accessories:

- solenoid valve
- limit switch
- electropneumatic positioner etc.

Available options (on request only):

- actuator – "cleaned and degreased for oxygen service"
- electric actuator
- valve with check disc
- valve with control disc (tapered design)

Actuated globe valve HEROSE Type 03643 / ANSI Flange Class 300 for cryogenic applications

Type – 03643 stainless steel, size – DN 15-DN 150. Cryogenic-globe valves with pneumatic actuator – class 150. "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapors and cryogenic liquefied gases incl. LNG.

- stainless steel body and top work
- actuator – air opens, spring closes or contrary" live loaded " gland packing
- "cleaned and degreased for oxygen service" – the actuator is not cleaned and degreased for oxygen
- working temperature – -196...+120°C
- flanged connection acc. to ANSI B16.5 class 300

Type 03643 ANSI	Technical Data									
Nominal Size	DN	15	20	25	40	50	65	80	100	150
Face-to face dimension, mm	Overall Length	140	150	160	200	230	290	310	350	577
	Height, mm	370	370	375	420	425	510	575	635	685

Type 03643 ANSI	Technical Data									
Nominal Size	DN	15	20	25	40	50	65	80	100	150
Face-to face dimension, mm	Overall Length	140	150	160	200	230	290	310	350	597
	Height, mm	370	370	375	420	425	510	575	635	685

Actuated Globe Valve HEROSE Type 03643 / DIN Flange for cryogenic applications

Type – 03643 stainless steel, size – DN 15-DN 150, pressure range: cryogenic-globe valves with pneumatic actuator – PN 40, "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapors and cryogenic liquefied gases incl. LNG.

- stainless steel body and top work
- actuator – air opens, spring closes or contrary "live loaded" gland packing
- "cleaned and degreased for oxygen service" – the actuator is not cleaned and degreased for oxygen
- working temperature – -196...+120°C
- flanged connection acc. to DIN EN 1092-1 PN 40

For both executions there are Available accessories:

- solenoid valve
- limit switch
- electropneumatic positioner etc.

Available options (on request only):

- actuator – "cleaned and degreased for oxygen service"
- electric actuator
- valve with check disc
- valve with control disc (tapered design)

Actuated globe valve HEROSE Type 03643 / DIN flange for cryogenic applications

Type – 03643 stainless steel, size – DN 15-DN 150, pressure range: cryogenic-globe valves with pneumatic actuator – PN 16. "Fire safe" type test approval acc. to EN ISO 10497. Approved for air gases, vapors and cryogenic liquefied gases incl. LNG.

- stainless steel body and top work
- actuator – air opens, spring closes or contrary "live loaded" gland packing
- "cleaned and degreased for oxygen service" – the actuator is not cleaned and degreased for oxygen
- working temperature – -196...+120°C
- flanged connection acc. to DIN EN 1092-1 PN 16

Type 03643 DIN fl.	Technical Data

HEROSE

Ball valve Type PY4 extended for cryogenic applications

Type – PY4 stainless steel / extended ball valve, size – 1/4-2" (DN 8-DN 50), pressure range:

- to DN 20 – 100 bar
- to DN 32 – 70 bar
- to DN 50 – 50 bar

Temperature range – -196...+190°C.

- stainless steel extended spindle
- 3-piece cryogenic ball valve complete with live loaded packing and pressure relief hole.
- fire-safe
- cleaned & packed for oxygen service

Ball valve Type PY4 non-extended for cryogenic applications

Type – PY4 stainless steel / non-extended ball valve, size – 2 1/2-6" (DN 65-DN 150), pressure range:

- to DN 80 – 40 bar
- to DN 150 (reduced bore only) – 25 bar

Temperature range – -50...+190°C.

- stainless steel non-extended spindle
- 3-piece low temperature ball valve complete with live loaded packing and pressure relief hole
- fire-safe, 3-way valves and end connection options
- cleaned & packed for oxygen service

Ball valve Type PY4 non-extended for cryogenic applications

Type – PY4 stainless steel / non-extended ball valve, size – DN 8-DN 50), pressure range: to DN 20 – 100 bar; to DN 32 – 70 bar; to DN 50 – 50 bar. Temperature range – -50...+190°C.

- stainless steel non-extended spindle
- 3-piece low temperature ball valve complete with live loaded packing and pressure relief hole
- fire-safe, 3-way valves and end connection options
- cleaned & packed for oxygen service

Type PY4 Extended	Technical Data								
Nominal Size	DN	8	12	15	20	25	32	40	50
